4385 **COUPLING SHAFT (INTER TRANSMISSION) — Cont'd**

If stamped identification is known, refer to Section 46.1 Page 6 for cross reference to service part number

Components for complete shaft assemblies are also available for service. When the service part number for the complete shaft assembly is known, the part number of the shaft sub-assembly and related components may be found in the Drive and Coupling Shaft Component Parts List in Section 46.1A.

▲ Refer to page 1 of Section 46.1 for an explanation of the codes shown, S – Solid Shaft, G – Gas, D – Diesel

⊕ If shaft is identified C8HA 4606-R, T, V, NA or D0HA 4606-U, V, LA use Code 13 slip yoke and Code 14 U-joints.– If shaft is identified D2HA 4606-HA,JA,LA,NA,RA or SA use Code "70" slip yoke and Code "41" U-joints.

NOTE 1 – Shaft assy. uses 7C size joint NOTE 2 – Shaft assy. uses 1710 size joint NOTE 3 – Shaft assy. uses 72N size joint

NOTE 4 – "Before Ser. S80,001" NOTE 5 – "From Ser. S80,001" NOTE 6 – Shaft assy. uses 6C size joint

NOTE 7–"Before Ser. W60,001", Note 8–"From Ser. W60,001"

● For service shaft refer to group 4A603 in Section 46.1

4385 COUPLING SHAFT (INTER TRANSMISSION) — Cont'd

If stamped identification is known, refer to Section 46.1 Page 6 for cross reference to service part number

Components for complete shaft assemblies are also available for service. When the service part number for the complete shaft assembly is known, the part number of the shaft sub-assembly and related components may be found in the Drive and Coupling Shaft Component Parts List in Section 46.1A.

▲ Refer to page 1 of Section 46.1 for an explanation of the codes shown, S – Solid Shaft, G – Gas, D – Diesel

⊕ If shaft is identified C8HA 4606-R, T, V, NA or D0HA 4606-U, V, LA use Code 13 slip yoke and Code 14 U-joints.– If shaft is identified D2HA 4606-HA,JA,LA,NA,RA or SA use Code "70" slip yoke and Code "41" U-joints.

NOTE 1 – Shaft assy. uses 7C size joint NOTE 2 – Shaft assy. uses 1710 size joint NOTE 3 – Shaft assy. uses 72N size joint

NOTE 4 – "Before Ser. S80,001" NOTE 5 – "From Ser. S80,001" NOTE 6 – Shaft assy. uses 6C size joint

HOW TO LOCATE DRIVE LINE PART NUMBERS

1. USE THE DRIVE LINE T.S.L. or STAMPED IDENTIFICATION NUMBER CROSS REFERENCE GUIDE.

Refer to page 6 of this section for a cross reference from stamped numbers on shaft or Truck Specification List (T.S.L.) driveshaft numbers to service part numbers.

2. USE THE DRIVESHAFT APPLICATION CHART.

a. Refer to page 34 for the Driveshaft Application Chart Index.
1973/79 – All models

b. Manufacturer codes used throughout the chart are cross referenced as follows:

E – Eaton R – Rockwell (Timken)

c. Universal joint, slip yoke and flange yoke codes used throughout the chart are cross referenced to service part numbers on the next page.

d. The Driveshaft "Types" and the "A" and "B" designations are illustrated on page 5 of this section.
Group 4602 is a shaft assy. and incl. the shaft, universal joints and the slip yoke.
Group 4A603 is a shaft assy. with slip yoke only.
Group 4605 applies to the driveshaft only as shown on page 5 of this section. Various shafts listed throughout the Drive Shaft Application Chart in Section 46.2 thru 46.5 are coded with symbol ●. After selecting the part number shown in the Driveshaft Application Chart refer to page 31 of this section for the appropriate service replacement shaft. The service replacement shaft (4A603) incl. a new slip yoke. Service replacement shafts (4A603) are listed in part number sequence on page 33 of this section. The shaft length and diameter and also the slip yoke are shown for each shaft.

e. Typical drive line and universal joint illustrations for single and tandem axles are shown on pages 3 and 4 of this section.

3. USE THE DRIVE and COUPLING SHAFT COMPONENT PARTS LIST.

When the part number for the complete shaft assembly is known, the part number of the shaft sub–assembly and related components may be found in the Drive and Coupling Shaft Component Parts List in section 46.1A.

4. USE THE DRIVE LINE ILLUSTRATIONS.

a. Refer to the "Typical" drive line illustrations on pages 3 and 4 of this section to obtain a basic group number.
b. Refer to the group number in the catalog. Determine the part number needed from that group or follow cross references to other groups to determine the part number needed.

5. USE THE ALPHABETICAL INDEX.

a. Refer to the alphabetical part name index at the beginning of the catalog to obtain a basic group number.
b. Refer to the group number in the catalog. Determine the part number needed from that group or follow cross references to other groups to determine the part number needed.

DRIVE LINE CROSS REFERENCE GUIDE

1. Find the shaft assembly number shown on the Truck Specifications List (T.S.L.†) or stamped on the shaft.
2. Refer to the T.S.L. or identification number on this chart to obtain the complete service shaft assembly part number.
3. Shafts symboled (●) are serviced in a 4A603 shaft, knuckle and plug assembly. Refer to group 4A603 in this section for a cross–reference from the shaft assembly number to service shaft number.
4. The components for other complete shaft assemblies are also available for service. When the service part number for the complete shaft assembly is known, the part number of the shaft sub–assembly and related components may be found in the Drive and Coupling Shaft Component Parts List in section 46.1A.

DRIVE SHAFT APPLICATION CHART INDEX

Components for complete shaft assemblies are also available for service. When the service part number for the complete shaft assembly is known, the part number of the shaft sub–assembly and related components may be found in the Drive and Coupling Shaft Component Parts List in Section 46.1A.

This Section cross-references driveshaft, coupling shaft, intermediate coupling shaft and inter transmission coupling shaft assemblies to optional component parts. To locate optional component parts do the following:

1. Find the shaft assembly number as shown in the Driveline Cross-Reference Guide Section 46.1, page 6 or the appropriate Shaft Application Chart.
2. Refer to the known Complete Shaft Assembly number below for the appropriate Shaft Sub-assembly and related components.
