HOW TO FIND ENGINE PARTS

1. IF THE ENGINE HAS AN ENGINE IDENTIFICATION TAG:

a. See the explanation on page 2 as to where the tag is located and the use of "Change Level".

b. Locate the engine cubic inch displacement (C.I.D.) shown on the engine tag.

c. Use the engine C.I.D. and the Engine Parts List Index (on page 3 to find the engine parts list required.

EXAMPLE: If the Engine Identification Tag shows engine C.I.D. to be 401 then the Engine Parts List Index shows that parts for that engine are listed in Parts List Section 60.3.

2. IF THE VEHICLE SERIAL NUMBER IS KNOWN:

a. Determine the engine cubic inch displacement (C.I.D.) from the General Information Section of this catalog, using the fourth character of the vehicle serial number.

b. Use the engine C.I.D. and the Engine Parts List Index (on page 3) to find the engine parts list required.

EXAMPLE: A 1973 L900 model with serial prefix F90HV has a 401 C.I.D. engine, as shown for engine code "H" in the General Information Section. The Engine Parts List Index (section 60 page 3) shows parts for this engine are listed in Parts List Section 60.3.

3. IF THE ENGINE CUBIC INCH DISPLACEMENT (C.I.D.) IS KNOWN, USE THE ENGINE PARTS LIST INDEX (SEC. 60, PAGE 3) TO FIND THE CORRECT ENGINE PARTS LIST SECTION.

4. IF THE TRUCK HAS A TRUCK SPECIFICATION LIST (T.S.L.):

a. Locate the engine code number shown on the T.S.L.

b. Use the Engine T.S.L. Cross–Reference Guide beginning on page 4 to find the correct Parts List Section.

EXAMPLE: The Engine T.S.L. Cross–Reference Guide shows that engine code MO 701–A on the T.S.L. represents an 8 cylinder 401 C.I.D. engine, for which parts are listed in Parts List Section 60.3.

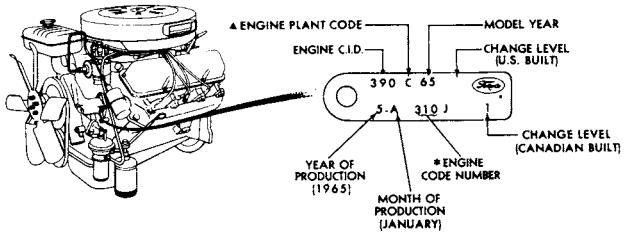
ENGINE IDENTIFICATION TAG

IN ALL INQUIRIES ALWAYS FURNISH THE COMPLETE TAG IDENTIFICATION INFORMATION

All Ford engines for 1973/ include an engine identification tag. This tag describes C.I.D., model year, year and month of production, change level number & engine caliberation information. All engine code numbers consists of a basic number, a suffix, and in some cases a prefix. Generally the basic number is adequate for engine identification, if additional information is needed the prefix or suffix is included.

The catalog uses the change level number in the same manner as date restriction information is presently used. The change level number is advanced only when a replacing part or assembly being introduced and the old part or assembly it replaced are not completely interchangeable. These Engine Code Numbers and their designations are listed in the Engine Identification Chart which follows.

1973 - "BEFORE 2/1/73"

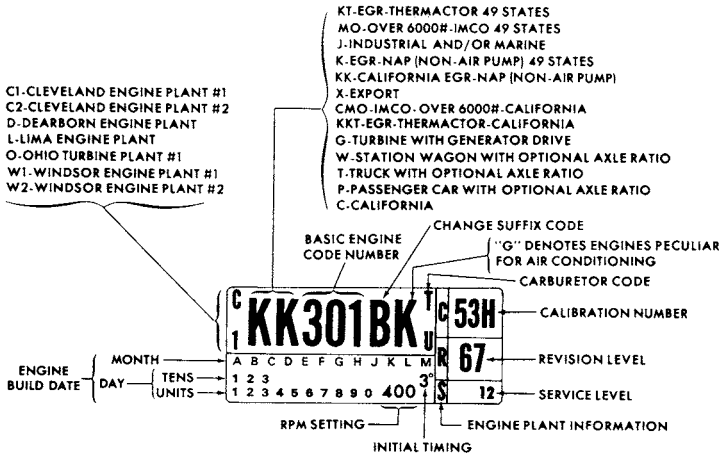


*Except when indicated in the chart below prefixes and suffixes are for Ford Motor Company use only and do not affect engine identification.

P-4469

IDENTIFICATION TAG IS LOCATED UNDER THE IGNITION COIL ATTACHING BOLTS ON ALL 6 CYL. ENGINES, UNDER THE HEAT INDICATOR BULB ON 8 CYL. 330, 359, 361, 391 ENGINES AND UNDER THE CARBURETOR ATTACHING STUD – ON 8 CYL. 401, 475, 477, 534 ENGINES

1973 - "FROM 2/1/73"



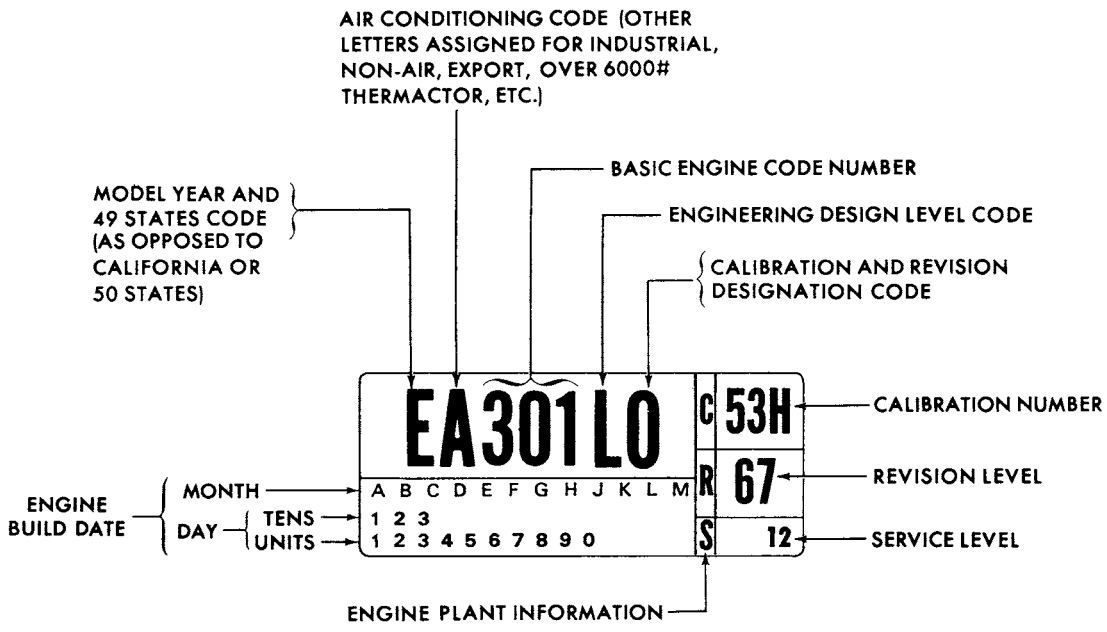
ENGINE LABEL LOCATION-NOTE 1

P-10885

NOTE 1– New label (decal) installations will be made as follows:

ENGINE TYPE	LOCATION
6 Cylinder 300 H/D	Front of Rocker Cover
8 Cylinder 330 H/D, 359,361,391,401,475,477,534	Front of the Right Hand Rocker Cover

1974/



ENGINE LABEL LOCATION-NOTE 1

ENGINE PARTS LISTS INDEX

Engine parts are cataloged in separate sections for each related family or group of engines as follows.

	ENGINE GROUP	PARTS LIST SECTION
CYLINDER GASOLINE	4.9L (300 C.I.D.)	60.1
8 CYLINDER GASOLINE	5.4L (330 C.I.D.), 5.9L (359,361 C.I.D.)	60.2
	6.4L (389, 391 C.I.D.)	
	6.1L (370 C.I.D.), 7.0L (429 C.I.D.)	60.2A
	6.6L (401 C.I.D.), 7.8L (475,477 C.I.D.)	60.3
	8.8L (534 C.I.D.)	
CATERPILLAR DIESEL	6 cyl. 14.6L (893 C.I.D.)	60.8
	8 cyl. 8.5L (522 C.I.D.), 9.4L (573 C.I.D.)	60.6
	10.4L (636 C.I.D.)	
CUMMINS DIESEL	6 cyl. 14.0L (855 C.I.D), 15.2L(927 C.I.D.)	60.4
	6 cyl. 18.8L (1150 C.I.D.)	60.7
	8 cyl. 9.1L (555 C.I.D.), 14.8L (903 C.I.D.)	60.7
DETROIT DIESEL	6 cyl. 6.9L (426 C.I.D.), 9.0L (552 C.I.D.)	60.5
	8 cyl. 9.3L (568 C.I.D.), 12.0L (736 C.I.D.)	60.5

NOTE 1– New label (decal) installations will be made as follows:

ENGINE TYPE	LOCATION
6 cylinder 300 H/D	Front of Rocker Cover
8 Cylinder 330 H/D, 359,361,370,391,401,429,475,477,534	Front of the Right Hand Rocker Cover

ENGINE IDENTIFICATION CHART &
ENGINE T.S.L. CROSS-REFERENCE GUIDE

See explanation under 'How to Find Engine Parts' on page 1 of this section.

T.S.L. ENGINE NO.	MANUFACTURER'S INFORMATION	TYPE FUEL	NO. CYL.	C.I.D.	PARTS LIST NO.	ENGINE ASSY. NO.
Note:	△ Parts information in this catalog for the diesel engines manufactured by Cummins Engine Co., Caterpillar Tractor Co., and Detroit Diesel Engine Division is generally restricted to engine accessories and engine related parts furnished by Ford Motor Company. Engine assemblies (basic 6007), when offered, will be shown on their respective parts lists. Other parts peculiar to these diesel eng. may be ordered from the appropriate eng. manufacturer's distributor or dealer.

ENGINE IDENTIFICATION CHART

YEAR	NO. OF CYL.	CUBIC INCH DISP.	MODELS/RESTRICTIONS	WARRANTY PLATE CODE	MANUFACTURER NAME	MANUFACTURER MODEL	PARTS LIST SEC.	REMARKS
6 CYL. & 8 CYL. DIESEL ENGINES								
Note:			Parts information in this catalog for diesel engines manufactured by Cummins Engine Co., Caterpillar Tractor Co., and Detroit Diesel Engine Division is generally restricted to engine accessories and engine related parts furnished by Ford Motor Company. Engine assemblies (basic 6007), when offered, will be shown on their respective parts lists. Other parts peculiar to these diesel engines may be ordered from the appropriate engine manufacturer's distributor or dealer.

PULLEY IDENTIFICATION CHART

The purpose of this guide is to help determine service part numbers for crankshaft pulleys. Pulleys are identified with an engineering part number. Find the engineering number in the "IDENTIFICATION" column then order the number listed in the "SERVICE PART NUMBER" column. In some instances the service part number will have more sheaves than the original pulley; this is done to reduce the complexity of service parts.

PULLEY IDENTIFICATION CHART

HOW TO IDENTIFY TRANSMISSION PARTS

1. USE THE WARRANTY PLATE CODE:

a. The transmissions (main & auxiliary) are identified by a code on the vehicle Warranty Plate.
b. Refer to the General Information Section (under Warranty Plate Transmission Codes) to identify the transmission type and model.
c. Refer to the Model Application Chart (starting on page 17) to find the Parts List number, or Illustration Section and Page number.
d. Turn to the Parts List and select the component part desired.

2. USE THE TRANSMISSION CASE MARKINGS:

a. Find a painted marking on the transmission case.
b. Refer to the Transmission Identification Chart (starting on page 5) to find the Parts List number, or Illustration Section and Page number.
c. Turn to the Parts List and select the component part desired.

3. USE THE TRANSMISSION IDENTIFICATION TAG:

a. Find an identification tag or plate on the transmission case. (see pages 3 and 4 for illustrations showing locations).
b. Refer to the Transmission Identification Chart (starting on page 5) to find the Parts List number, or Illustration Section and Page number.
c. Turn to the Parts List and select the component part desired. (If the transmission case is replaced, transfer the tag to the new case so that identification will not be lost.)

4. USE THE MANUFACTURER'S NAME and MODEL NUMBER:

a. Refer to the Model Application Chart (starting on page 17) to find the Parts List number for the model – example. A 1973 B600 truck with New Process Model 435 identified 10395 uses Parts List number 70.6A.

5. USE THE TRUCK YEAR and MODEL:

a. Refer to the Model Application Chart (starting on page 17) to find the Parts List number, or Illustration Section and Page number for the truck model (The chart is arranged by model year, within each model year, it is arranged by Truck Series.)
b. Turn to the Parts List and select the component part desired.

6. USE THE THE TRUCK SPECIFICATION LIST (T.S.L.):

a. Kentucky–built trucks contain a T.S.L.
b. Locate the "Transmission Assy." number or "Auxiliary Transmission" number on the T.S.L.
c. Use the Transmission Identification Chart (Page 5) to find the Parts List number.
d. Turn to the Parts List and select the component part desired.

TRANSMISSION PARTS LIST INDEX

Parts lists are grouped by type and number of speeds and each group of related transmission parts lists is shown in a separate section. The section number can readily by identified with the transmission parts list numbers as shown in the following example:

TRANSMISSION TYPE	NUMBER OF SPEEDS	PARTS LIST NUMBER	TRANSMISSION SECTION NO.
Clark	5	9	70.9
Dana (Spicer) aux.	3 & 4	3	70.3
Dana (Spicer) (5000,6000 series)	5	11	70.11
Dana (Spicer) (8000 series)	5	12	70.12
Dana (Spicer) (SST 1062 Series)	6	23	70.23
Dana (Spicer)	7	21	70.21
Dana (Spicer)	10	22	70.22
Dana (Spicer)	16	20	70.20
Fuller	5	10	70.10
Fuller	6	18	70.18
Fuller	8	13	70.13
Fuller	10	14	70.14
Fuller	9 & 13	19	70.19
New Process	4	6	70.6
New Process	5	8	70.8
Rockwell (Timken) transfer case		17	70.17
Warner	4	7	70.7

Kit part numbers are shown in their respective parts lists. A listing of the components for each kit is shown in Section 70A.

Sections 70.1 thru 70.22 and 70A follow Section 70. Immediately following Section 70A, the Ford basic groups are continued in Section 71.

Parts lists are also provided for Auxiliary transmissions and the 4/W/D transfer case. Data for identifying Auxiliary transmissions and the 4/W/D transfer case is included in the Transmission Identifcation Chart following the main transmission listing for the affected model year.

		A	B	C	D	E	F	G	H	J	K	L	M
KEY (COUNTERSHAFT GEAR)	7B220												
Fifth and sixth speed–3/8" x 3/8" x 1 9/16"	D3HZ 7B220–B	2	2	2									
Seventh, eighth, ninth, tenth, hi and lo splitter–3/8" x 3/8" x 2 1/2"	D3HZ 7B220–A	6	6	6									
Third and fourth–3/8" x 1/2" x 1 23/32"	357630–S(LL–10)	2	2	2									
HOUSING (GEARSHIFT)	7222												
	D4HZ 7222–A	A	B										
#97–16–13–51X, C97–16–4, 13 1/4" wide x 19 7/32" long	D4HZ 7222–G			C									
Flatwasher–5/8"	44742–S8(X–42)	2	2	2									
Bolt–hex. head–3/8"–16 x 1 1/8"	376284–S2(BB–291)	10	10	10									
Lockwasher – 3/8" external tooth	351487–S(XX–291)	10	10	10									
GASKET	7223												
Gearshift housing–18 7/32" x 13 1/4" x 1/32" thick	D3HZ 7223–B	A	B	C									
Splitter cap piston – 2 1/8" x 2 7/8" x 1/32" thick	D4HZ 7223–D	A	B	C									
FORK (GEAR SHIFTER)	7230–1												
First, second and reverse–2 25/32" inside width	D3HZ 7231–A	A	B	C									
Seventh, eighth, ninth and tenth – 2 25/32" spana	D4HZ 7230–A			C									
	D4HZ 7230–C	A	B										
Splitter – incl. inserts	D4HZ 7230–B			C									
	D4HZ 7230–D	A	B										
PIN (GEARSHIFT BLOCKER) – also refer to group 7033	7233												
PISTON (SPLITTER) – 1/2" I.D. x 2 1/4" O.D. x 1/2" wide	D3HZ 7233–A	A	B	C									
Nut–hex. head–7/16"–20	★55696–S2	A	B	C									
7/16" O.D. x 1" long	D3HZ 7233–B	A	B										
1/2" O.D. x 13/16" long–rounded both sides	D3HZ 7233–C	2	2	2									
SPRING	7234												
SHIFTER SHAFT POPPET – shift finger plunger–2" free length–13 coils	D3HZ 7234–A	A	B	C									
Shift rod poppet ball – 1 11/32" free length–1 1/2 coils	D4HZ 7234–B	3	3	3									
Shift rod stop pin – 1" free length – 8 7/8 coils	D4HZ 7234–A	A	B										
Ball – 7/16"	353086–S(AA–14)	3	3	3									
PIN (GEARSHIFT ROD INTERLOCK) – 1/4" O.D. x 11/16" long	C1TT 7235–A	A	B	C									
SHIFT (GEARSHIFT)	7240–1												
First, second and reverse – 7/8" O.D. x 9 3/16" long	D4HZ 7240–A			C									
Third, fourth, fifth and sixth–7/8" O.D. x 6 7/16" long	D4HZ 7240–B			C									
Seventh, eighth, ninth and tenth–7/8" O.D. x 6 1/16" long	D4HZ 7241–B			C									
Splitter – 7/8" O.D. x 7 5/8" long	D4HZ 7241–A			C									
First, second and reverse – 7/8" O.D. x 11 11/16" long	D4HZ 7240–C	A	B										
Third, fourth, fifth and sixth–7/8" O.D. x 9 1/8" long	D4HZ 7240–D	A	B										
Seventh, eighth, ninth and tenth–7/8" O.D. x 9 1/8" long	D4HZ 7241–D	A	B										
Splitter–7/8" O.D. x 5 5/32" long	D4HZ 7241–C	A	B										

NOTICE: When the parts list suffix is shown in the quantity required column, the quantity is one (1).

DESCRIPTION/RESTRICTIONS	PART NUMBER	TRANSMISSION PARTS LISTS 22A THRU 22M											
		A	B	C	D	E	F	G	H	J	K	L	M
PLUNGER (SHIFT BRACKET)	7247												
Low, second and reverse–2 3/4" long	D3HZ 7247–A	A	B	C									
Pin–roll–3 5/64" x 9/16"	359014–S2(NN–86)	A	B	C

TRANSMISSION KIT PARTS LIST

Instructions for identifying Transmission Assemblies and their related Parts List Numbers are shown on Page 1 of Section 70.

Kit part numbers are included in their appropriate parts lists in Section 70.3 and up.

Included in this section is a listing of components for each kit.

Parts Lists for new kits will be added at the end of this section, irrespective of part number.

Always refer to the Index below for page numbers on which kit components are listed.

HOW TO FIND SERVICE PART NUMBERS FOR COMPONENTS OF GEARSHIFT TOWERS OR AUXILIARY GEARSHIFTS

1. Locate the number shown in the space marked "Gearshift Tower Assy." or "Auxiliary Gearshift Assy." on the Truck Specification List (T.S.L.)

2. Use the Cross–Reference below to find the Parts List Number. (T.S.L. number 7202 and 7210 have direct cross–reference to a service part number)

3. Refer to the appropriate parts list and select the desired component parts

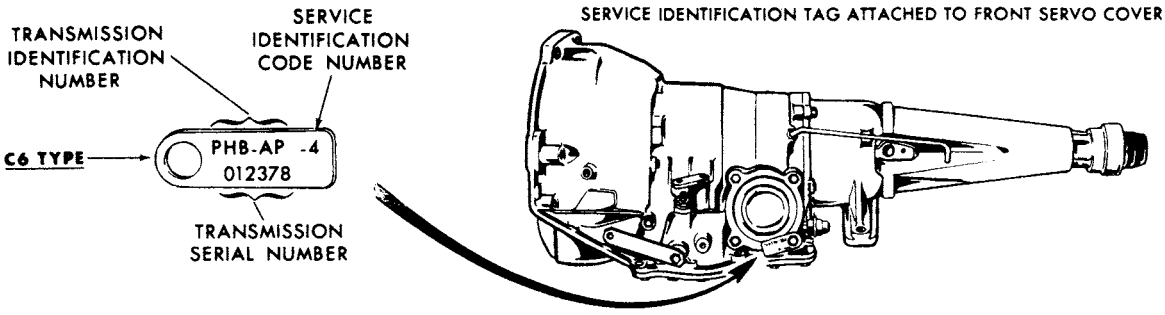
HOW TO IDENTIFY AUTOMATIC TRANSMISSION PARTS

There is one type of automatic transmission offered as optional equipment.

This transmission is identified by a number on a metal tag or plate attached to the case. See the illustration below for the location of the tag or plate.



The identification number and model application of the transmission are listed in the chart below.

If detailed parts directly related to the transmission are required, refer to Parts List Section A70.4. If parts not directly related to but functionally used with the transmission are required, refer to Section A71.

When the group number is not known, refer to Section A70 of the Illustration Catalog, Form FP 8097–B, or the Chassis Alphabetical Index at the front of this catalog.

7000 TRANSMISSION ASSY.

SERVICING ALLISON TRANSMISSION

ASSEMBLIES and RELATED COMPONENT PARTS.

Orders for replacement service component parts and assemblies for Allison Transmissions (AT and MT Series) are to be directed to your authorized Detroit Diesel Allison Distributor. Parts not directly related to, but functionally used with the Transmission can be found in this section.

RADIATOR CROSS REFERENCE GUIDE

A To use this guide
1. Find the identification marking on radiator top tank or the side mounting bracket.
2. Locate this number in the identification column below.
3. Read across to next column to right to find the service number.

B If the radiator identification is not known, the pages following this guide have radiator part numbers arranged in the following order:

1. Truck Series
2. Model years
3. Number of cylinders
4. Cubic inch displacement

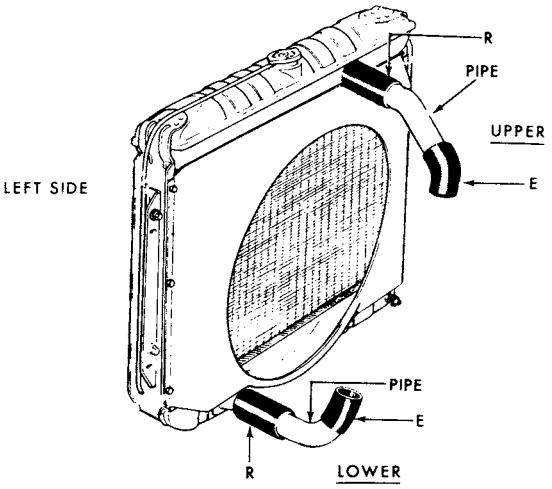
8260 HOSE (RADIATOR)



RADIATOR HOSE LOCATIONS (TYPICAL)

CUT POINT– Many new molded hoses are designed for multiple applications. Cut–off instructions to fit specified applications are provided with the affected hoses. Appropriate cut–off marks (A,B,C) are imprinted on the cuff of the hose. The cut–off point is shown on the application charts which follow.

HOSE USAGE– Where more than one upper or lower hose is used, see the "Location" column to find the hose used from pipe–to–radiator (R), pipe–to–engine (E), or oil cooler (O).

Motorcraft numbers as they appear in the model application chart which follows can be used to determine diameter and length of the hose as explained below.

FLEXIBLE
RADIATOR HOSE
FIRST LETTER PREFIX: K – Designates the hose line in all cases.
SECOND LETTER PREFIX: A – Designates 1 1/4" inside diameter at end opening.
B–Designates 1 1/2" inside diameter at end opening.
C–Designates 1 3/4" side diameter at end opening.
D–Designates 2" inside diameter at end opening.

NUMBERS: (There must always be a three digit numeral). First two digits designate the amount of full inches of hose length. Third digit designates the remaining fraction of an inch (expressed in eights of an inch) of hose length.

EXAMPLE: KAB–194–Flexible radiator hose having a 1 1/4" inside diameter at one end and a 1 1/2" inside diameter at the other end opening and a hose length of 19 1/2".
KC–092 – Flexible radiator hose having a 1 3/4" end opening inside diameter at both ends and a hose length of 9 1/4".

MOLDED
RADIATOR HOSE
FIRST LETTER PREFIX: K – Designates the hose line in all cases.
SECOND and THIRD LETTER PREFIX: M – Designates the molded curved type hose.
S – Designates the moulded straight type hose.

NUMBERS: Sequential numbering system beginning with the numeral "1".

EXAMPLE: KM–174 – Motorcraft moulded curved radiator hose.
KS–7 – motorcraft moulded straight radiator hose.

8620 BELT (DRIVE)

DRIVE BELTS
HOW TO IDENTIFY FAN BELTS

1. By size and length – the Motorcraft Part Number allows you to determine belt size as explained below.

FIRST LETTER PREFIX: J–Designates the V–belt in all cases

SECOND LETTER PREFIX:

Designates	Top width of belt	Designates	Top width of belt
A	13/32"	G	7/8"
B	15/32"	H	1/4"
C	1/2"	M	19/32"
D	5/8"	P	23/32"
E	11/16"	R	17/32"
F	3/4"		

NUMBERS: (There must always be a three digit numeral)
First two digits designate the amount of whole inches of outside circumference of the belt.
Third digit designates the remaining fraction of an inch (expressed in eights of an inch) of outside circumference of the belt.

LETTER SUFFIXES: Suffixes will designate special types of V–belts–
C–for cog belts, L–for laminated belts

EXAMPLES: *JB–493–L–Laminated belt with 15/32" top width and 49 3/8" outside circumference.
*JF–535–C–Cog belt with 3/4" top width and 53 5/8" outside circumference.

2. By identification marking–refer to following chart.
3. By year, model and application–refer to listing beginning on page 16 of this section.

BELT IDENTIFICATION MARKING TO SERVICE PART NUMBER GUIDE

The purpose of this guide is to help find service part numbers for fan belts. Belts are identified with a marking on the outer (wide) surface of the belt. Although the identification marking and service part number may be the same in some instances, this is not generally true. Find the belt marking in the "Belt Identification Marking" column, then order the number listed in the "Service Part Number" column. Following the guide chart, belt part numbers are listed by model year to help find service part numbers when the belt marking is not known.

IDENTIFICATION CHART

8620 BELT (DRIVE)

Note: * Identification number is same as Motorcraft sales number.
Any production belt with numerals in the suffix, such as A1A,A2A etc., are the same as the suffix AA.
EXAMPLES# D2VE 8620–L1A,L2A,L3A,L4A belts are the same as D2VE 8620–LA.

HOW TO IDENTIFY CARBURETORS and RELATED PARTS

To facilitate the identification of service parts for a specific carburetor, parts lists or bills of material are provided in Section 95.19 and up of this catalog for each carburetor assembly. It is necessary first to identify the carburetor assembly per the instructions that follow.

Carburetors can be identified by the stamping number shown on the carburetor or on a metal tag attached to the carburetor.

Each carburetor for 1973/ models has an identification tag. An illustration and explanation of the carburetor identification tags are shown on Page 2 of this section.

If either the tag or stamping identification number is known, the related carburetor and carburetor parts list numbers can be determined from the Chart beginning on Page 2 of this section.

Carburetors and their parts lists can also be identified by Engine, Model Year, etc. in the Carburetor Application Chart beginning on Page 4 of this section. Also shown in the Carburetor Application Chart is the page number for a typical parts illustration for each carburetor assembly.

Carburetor illustrations are shown in Illustration Section 95 of Form FP 8097–B.

Parts lists are grouped by type and engine and each group of related carburetor parts lists is shown in a separate section. The section number can readily be identified with the carburetor parts list numbers as shown in the following example:

Carburetor Type	No. of Cyls.	Engine C.I.D.	Parts List Number	Catalog Section No.
Carter 1/B	6	300	33A	95.33
Ford 2/B	8	330H/D, 330XD	19A, 19B	95.19
Holley 2/B	8	330H/D, 330XD	20A, 20B	95.20
Holley 4/B	8	401, 475, 477, 534	27A, 27B, 27C	95.27

For ready reference, kit part numbers are shown with the carburetor identification guide. A listing of components for each kit is shown in Section 95A. Refer to the Index at the beginning of Section 95A for page number of service kit.

Carburetor attaching parts are shown at the beginning of their respective parts lists.

To identify the parts for a specific carburetor it is only necessary to refer to the related parts list and parts illustration.

An Alphabetical Index showing a cross–reference between noun description and Basic Group number is located at the beginning of this catalog.

IMPORTANT: ALWAYS FURNISH APPROPRIATE WARRANTY PLATE INFORMATION and DSO NUMBER IF APPLICABLE WHEN ORDERING PARTS NOT LISTED IN THE CATALOG.

HOW TO FIND CARBURETORS

To select the correct carburetor the following information must be known and utilized –

- Year
- Truck line (B700, LN600, CT900, etc.)
- Engine (6 cyl. 4.9L–300 C.I.D., 8 cyl. 6.1L–370 C.I.D., etc.)
- Transmission (manual, automatic, etc.)
- Other factors (California, hi–altitude, etc.)
- In some cases, more than one service carburetor may be specified in the catalog based on the above information. In these cases the identification part number shown on the carburetor is also required.

CARBURETOR KIT COMPONENTS

Instructions for identifying Carburetor Assemblies and their related Parts List Numbers are shown at the beginning of Section 95.

For ready reference, kit part numbers are shown in the carburetor identification chart in Section 95.

Included in Section 95A is a listing of components for each kit.

Parts Lists for new kits will be added at the end of this section, irrespective of part number.

Always refer to the following Index for page numbers on which components are listed.

2			Seal (governor wire)

QTY.	PART NUMBER	DESCRIPTION
★	D7PZ 9502-A	r/b D8PZ 9502-F
	*CG-459-A	
Consists of		
2		Gasket (float bowl)
1		Gasket (fuel inlet needle seat)
1		Gasket (fuel enrichment valve)
1		Gasket (thermo. choke housing)
1		Gasket (booster venturi support)
1		Gasket (fuel enrichment valve cover)
1		Washer (flat)
1		Gasket (decel. valve)
1		Gasket (thermo choke control)
1		Gasket (altitude compensator housing)
1		Gasket (altitude compensator)
	D7PZ 9502-B	
	*CG-501	
Consists of		
2		Gasket (sight plug)
2		"O" Ring (fuel connector tube)
2		"O" Ring (balance tube)
2		"O" Ring (fuel valve seat)
1		Gasket (secondary diaph. housing)
2		Seal (idle adj. needle)
2		Gasket (fuel valve seat nut)
2		Gasket (fuel valve seat lock screw)
2		Gasket (pump discharge nozzle)
8		Gasket (fuel bowl screw)
2		"O" Ring (pump transfer tube)
2		Gasket (metering body)
1		Gasket (enrichment valve)
1		Gasket (throttle body)
1		Gasket (flange insulator)
2		Gasket (fuel bowl)
	D8PZ 9502-G	
	*CG-574	
Consists of		
1		Gasket (sight plug)
1		Gasket (fuel valve seat nut)
1		Gasket (fuel valve seat lock nut)
1		Seal (governor housing)
2		Gasket (pump discharge nozzle)
1		Gasket (fuel inlet fitting)
1		Gasket (governor mounting)
1		Gasket (governor cover)
4		Gasket (fuel bowl screw)
2		"O" Ring (pump transfer tube)
1		Gasket (flange)
1		Gasket (fuel bowl)
1		Gasket (metering body)
1		Gasket (enrichment valve)
1		Gasket (flange insulator)
1		Gasket (ECS valve hsg.)
1		Gasket (metering body)
1		Gasket (float bowl)
1		Seal (ECS valve)
1		Gasket (throttle body)
1		Retainer (float)
1		Retainer (gov. diaph. link)
1		Retainer (ECS seal)
2		Wire (safety)
2		Seal (safety wire)

QTY.	PART NUMBER	DESCRIPTION
	D8PZ 9502-GB	
	*CG-574-A	
Consists of		
1		Gasket, sight plug
1		Gasket, fuel valve seat nut
1		Gasket, fuel valve seat lock nut
1		Seal, governor housing
2		Gasket, pump discharge nozzle
1		Gasket, fuel inlet fitting
1		Gasket, governor mounting
1		Gasket, governor cover
4		Gasket, fuel bowl screw
2		"O"-Ring, pump transfer tube
1		Gasket, flange
1		Gasket, enrichment valve
1		Gasket, flange insulator
1		Gasket, ECS valve housing
1		Seal, ECS valve
1		Gasket, throttle body
1		Gasket, fuel bowl
1		Gasket, metering body
1		Gasket, metering body
1		Gasket, fuel bowl
1		Retainer, float
1		Retainer, governor diaphragm link
1		Retainer, ECS seal
2		Wire, safety
2		Seal, safety wire
2		Screw, choke flate
1		Instruction sheet
	D8PZ 9502-H	
	*CG-575	
Consists of		
2		Gasket (sight plug)
2		"O" Ring (fuel connector tube)
4		"O" Ring (fuel valve seat)
1		Gasket (secondary diaph. housing)
2		Seal (idle adj. needle)
2		Gasket (fuel valve seat nut)
2		Gasket (fuel valve seat lock nut)
1		Seal (governor housing)
2		Gasket (pump discharge nozzle)
1		Gasket (fuel inlet fitting)
1		Gasket (throttle body screw)
1		Gasket (governor mounting)
1		Gasket (governor cover)
8		Gasket (fuel bowl screw)
1		Gasket (fuel inlet filter)
2		"O" Ring (pump transfer tube)
2		Gasket (fuel bowl)
2		Gasket (metering body)
1		Gasket (enrichment valve)
1		Gasket (throttle body)
1		Gasket (ECS valve hsg.)
1		Gasket (metering body-pri.)
1		Gasket (fuel bowl-pri.)
1		Gasket (throttle body)
1		Seal (ECS valve)
2		Wire (safety)
2		Seal (safety wire)
