10A313 ALTERNATOR MOUNTING PARTS

Alternator mounting parts are listed in chart form following the illustration below. Refer to the illustration to determine the name of the part required. Refer to the chart to select the appropriate part number. The chart is listed by year, series, engine and alternator make and amperage.

Attaching parts such as bolts, nuts, etc. are listed by code number. A listing of the code numbers and their corresponding part numbers and descriptions appears at the end of the chart.

ALTERNATOR IDENTIFICATION and/or T.S.L. CROSS REFERENCE GUIDE

HOW TO FIND ALTERNATORS and COMPONENTS

By IDENTIFICATION on ALTERNATOR:

1. Locate marking (on alternator housing).
2. Check marking listed under Alternator Identification Chart below to find part number of service alternator, pulley, fan & spacer.

By MODEL IDENTIFICATION:

1. Refer to Alternator Application Chart beginning on page 24
2. Refer to appropriate Year, Model and Engine.

By IDENTIFICATION on TRUCK SPECIFICATION LIST: †

† Included with all trucks built at Louisville

1. Locate Altenator number shown on Truck Specification List.
2. Check Alternator number against Identification numbers listed below to find part numbers of service Alternator, Pulley, Fan & Spacer.
3. Select and refer to appropriate Parts List Section and Number.
4. If basic number is not known refer to Illustration Page shown, or to Index following the General Information Section of this Catalog.
5. Select part number shown for affected Parts List. If more than one part number is shown refer to Description and Restrictions for clarification.
6. Quantity of parts shown in columns A, B or C etc.
7. Parts are listed numerically.

IDENTIFICATION EXAMPLE: D2HF 10300–AC is listed in Parts List Section 103.1 Column C.

MODEL APPLICATION EXAMPLE: 1973 B600 uses 61 amp. Alternator (D2TZ 10346–B). Internal parts for this Alternator are listed in Parts List Section 103.1 Column 1C.

TRUCK SPECIFICATION LISTS EXAMPLE: D2HF 10300–AC appears on a Truck Specification List. The service alternator for this number is D2TZ 10346–B and internal parts for this Alternator are listed in Parts List Section 103.1 Column 1C.

10346 ALTERNATOR ASSY. — Cont'd

APPLICATION CHART

(Also see ALTERNATOR IDENTIFICATION CHART on pages 19 thru 23 of this Section)

Determine year, model, engine, make of alternator and amperage or identification. Find service Alternator as well as Voltage Regulator in adjacent column. Parts are listed in order of Make and Amperage.

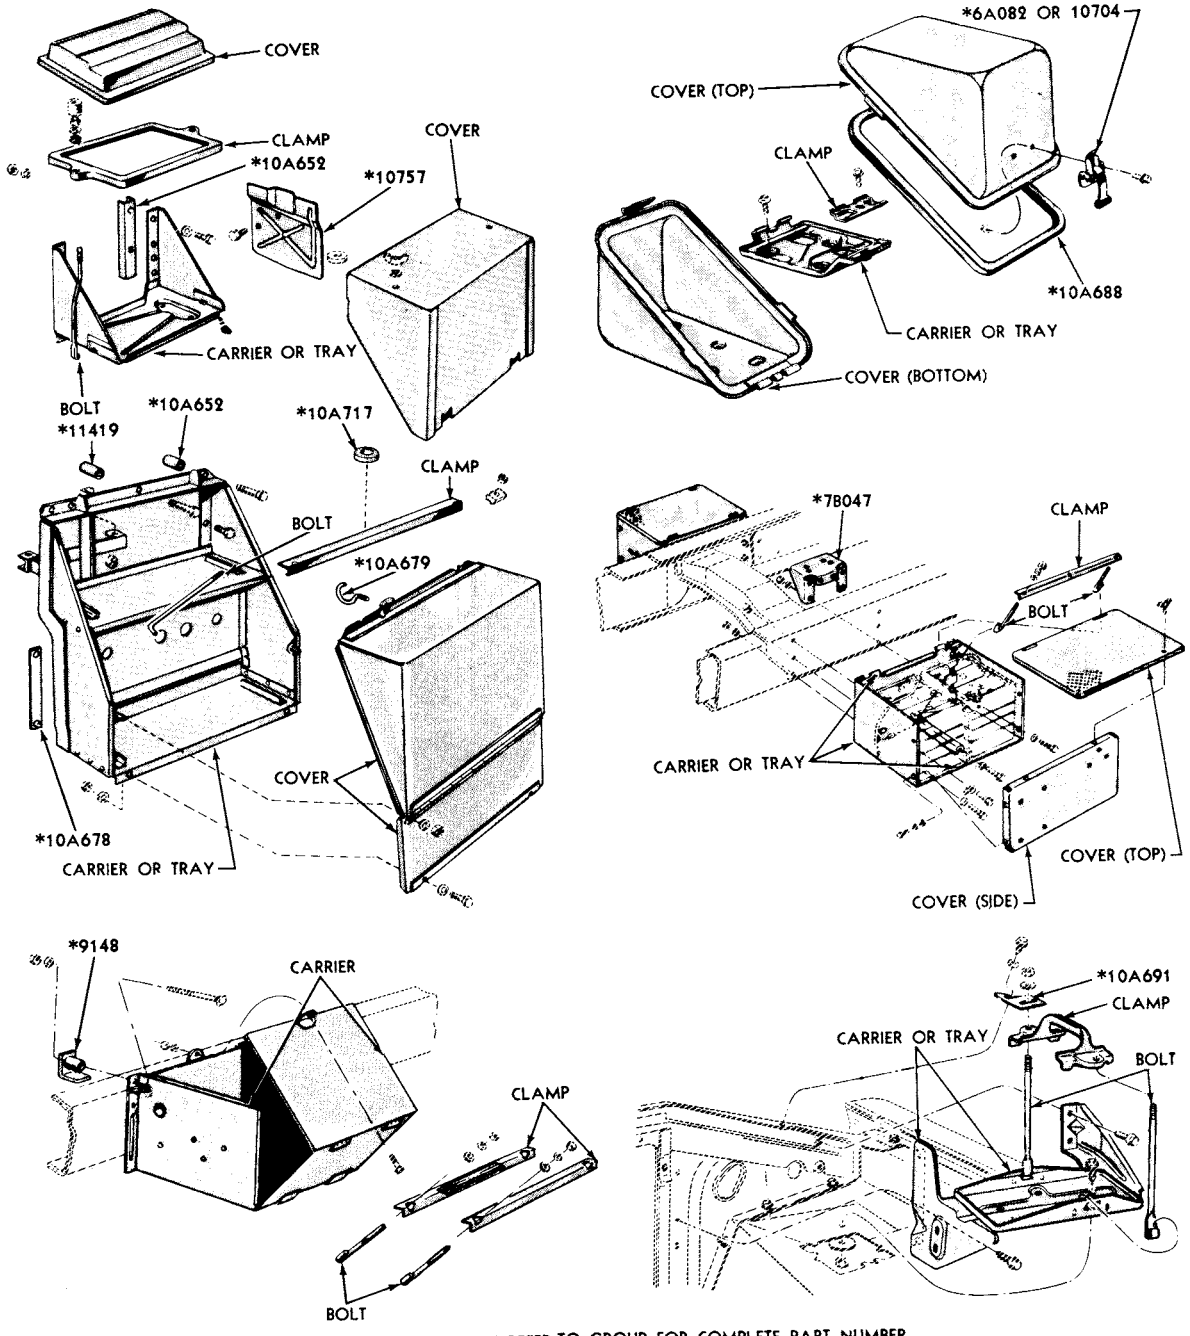
10732 BATTERY MOUNTING PARTS

Battery mounting parts are listed in chart form following the illustrations below. Refer to the illustration to determine the name of the part required. Refer to the chart to select appropriate part number. The chart is listed by year, model and amperage of battery.

Attaching parts such as bolts, nuts, etc. are listed by code number. A listing of code numbers and their corresponding part numbers and descriptions appears at the end of the chart.



*NOT INCLUDED IN CHART—REFER TO GROUP FOR COMPLETE PART NUMBER

11001–2 STARTER MOTOR

HOW TO FIND STARTERS and COMPONENTS

By IDENTIFICATION:

1. Refer to Identification chart below.
2. Check marking (on starter housing) against Identification numbers.

By MODEL APPLICATION:

1. Refer to Model Application Chart beginning on page 4.
2. Refer to appropriate Year, Model and Engine.

3. Select and refer to appropriate Parts List Section and Number.
4. If basic number is not known refer to Illustration Page shown, or to the Alphabetical Index which follows the General Information section of this catalog.
5. Select part number shown for affected Parts List. If more than one part number is shown refer to Description and Restrictions for clarification.
6. Quantity of parts shown in columns A, B or C etc.
7. Parts are listed numerically.

Identification Example — D2AF 11001–CA is listed in Parts List Section 110.1, Column A.

Model Application Example — 1973 B500 (6 cylinder Gas) uses starter C2OZ 11002–B. Internal parts for this starter are listed in Parts List Section 110.1, column A.

12127 DISTRIBUTOR ASSY.

HOW TO FIND DISTRIBUTORS and COMPONENTS

To find Distributor (other than Calibration) Parts:
(Calibration Parts are listed by Code Number on Page 6 of this section)

By IDENTIFICATION:

1. Refer to Identification Chart below.
2. Check marking (located on top side of distributor housing) against identification numbers.

By MODEL APPLICATION:

1. Refer to Model Application Chart on page 7 of this section.
2. Refer to appropriate Engine, Year and Model.

3. Select and refer to appropriate Parts List Section and Number.
4. If group number is not known refer to illustration page shown, or to the Alphabetical Index which follows the General Information Section of this catalog.
5. Select part number shown from appropriate Parts List. If more than one part number is shown, refer to Description and Restrictions for clarification.
6. Quantity of parts shown in columns A, B, C etc.
7. Part numbers are listed numerically.

Identification Example: D3HF 12127–AA is listed in Parts List Section 120.2 Column A. Calibration parts are listed by Code number on page 6 of this section. (Cam–group 12210, Springs–group 12191–2 and Diaphragm–group 12370) are listed by Code Number, etc.

Model Application Example: For an 8 cyl. 401 engine on a 1973 C900 use distributor D3HZ 12127–A. Internal parts for this distributor are listed in Parts List Section 120.2, column A.

CALIBRATION PARTS CHART

HOW TO FIND DISTRIBUTORS CALIBRATION PARTS

(Diaphragm Assy., Primary, Secondary, Vacuum Springs & Cam)

You must know the Distributor Identification Number:

1. Refer to Identification Chart on pages 3 and 4 of this section.
2. Check distributor for marking or identification number and locate same in chart.
3. Find Calibration parts listed by code number in adjacent columns.
4. Refer to Calibration Code and Part Number Cross Reference listed below for appropriate part number.

Example: Calibration parts for Distributor identified D3HF 12127–AA are–

PRIMARY SPRING–201–B8A 12192–A, SECONDARY SPRING–203–B8QH 12192–C,

CAM–101–C2TZ 12210–B, DIAPHRAGM ASSY.–305–D3HZ 12370–E

12405	SPARK PLUG ASSY.					
Note:	Important – Canadian regulations require that vehicles and other devices (other than aircraft) equipped with internal combustion engines using spark ignition systems and manufactured in or imported into Canada on or after September 1, 1976 be operated in conformance with restrictions on radio frequency interference. Use of non–resistor or non–inductive type spark plugs may cause such vehicles or devices to be out of compliance with these regulations.

WIRING MARKING or TAG NUMBER TO SERVICE WIRING PART NUMBER GUIDE

The purpose of this guide is to facilitate the identification of the Service Wiring Part Number. The chart that follows lists the Wiring Markings or Tag Numbers in numerical sequence. For many vehicles the Service Wiring Part Number will be the same as the Wiring Marking or Tag Number. This type of replacement will cause little or no installation problems. However, when the Service Wiring differs from the Wiring Marking or Tag Number it will be necessary to match lead wires and to tape up those lead wires which are not required. This is necessary when the Service Wiring has a more general application than the original wiring installed by the factory. Following this guide chart, Service Wiring Part Numbers are listed by model year and vehicle usage which will permit the identification of replacement wiring when the wiring identification marking or tag number is not known.

IMPORTANT Always furnish appropriate warranty or rating plate information and DSO number if applicable when ordering parts not listed in the catalog.

IDENTIFICATION CHART

Wiring Marking or Tag No.	Service Wiring Part Number	Wiring Marking or Tag No.	Service Wiring Part Number

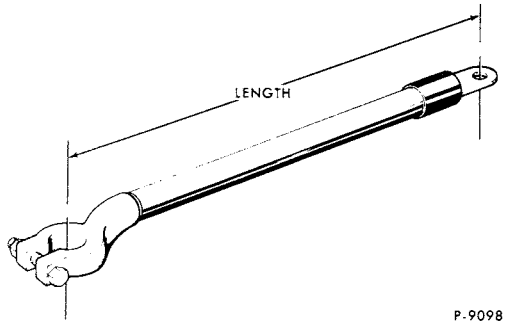
14300 CABLE ASSY. (BATTERY UNIVERSAL TYPE)



Battery cable terminals (battery end) are universal and may be used on either the positive or negative battery post. Battery cable length is determined by distance between hole centers.

BATTERY CABLE IDENTIFICATION CHART

14300-1 CABLE ASSY. (BATTERY)

The following chart will provide quick identification of the service part numbers when the identification marking is known. Also battery cables may be selected by model, year and description under group number 14300 which follows the chart.

14305 WIRING ASSY. (ALTERNATOR TO VOLTAGE REGULATOR)

WIRING MARKING or TAG NUMBER TO SERVICE WIRING PART NUMBER GUIDE

The purpose of this guide is to facilitate the identification of the Service Wiring Part Number. The chart that follows lists the Wiring Markings or Tag Numbers in numerical sequence. For many vehicles the Service Wiring Part Number will be the same as the Wiring Marking or Tag Number. This type of replacement will cause little or no installation problems. However, when the Service Wiring differs from the Wiring Marking or Tag Number it will be necessary to match lead wires and to tape up those lead wires which are not required. This is necessary when the Service Wiring has a more general application than the original wiring installed by the factory. Following this guide chart, Service Wiring Part Numbers are listed by model year and vehicle usage which will permit the identification of replacement wiring when the wiring identification marking or tag number is not known.

14398 WIRING ASSY. (DASH PANEL TO ENGINE)

WIRING IDENTIFICATION and/or T.S.L. CROSS-REFERENCE GUIDE

1. How to use the Truck Specification List (T.S.L.) to locate a dash panel-to-engine wiring service part number:
   a. Locate the dash panel-to-engine wiring part number shown on the Truck Specification List.
   b. Use the Cross-Reference below to find the correct service part number. NOTE: when the service wiring differs from the original wiring, it will be necessary to tape up unused lead wires.

2. How to use tag numbers or markings to locate a dash panel-to-engine wiring service part number:
   a. Locate a tag number or marking on the dash panel-to-engine wiring of the truck.
   b. Use the Cross-Reference below to find the correct service part number. NOTE: when the service wiring differs from the original wiring, it will be necessary to tape up the unused lead wires.

3. If a T.S.L. or marking is not available, obtain the truck model and year and refer to the model application listing below to locate the correct wiring part number.

IMPORTANT Always furnish appropriate warranty or rating plate information and DSO number if applicable when ordering parts not listed in the catalog.

14401 WIRING ASSY. (INSTRUMENT PANEL TO DASH PANEL)
WIRING IDENTIFICATION and/or T.S.L. CROSS-REFERENCE GUIDE

1. How to use the Truck Specification List (T.S.L.) to locate a cowl wiring service part number:

   a. Locate the cowl wiring part number shown on the Truck Specification List.
   b. Use the Cross-Reference below to find the correct service part number.

   NOTE: When the service wiring differs from the original wiring, it will be necessary to tape up unused lead wires.

2. How to use tag numbers or markings to locate a cowl wiring service part number:

   a. Locate a tag number or marking on the cowl wiring of the truck.
   b. Use the Cross-Reference below to find the correct service number.

   NOTE: When the service wiring differs from the original wiring, it will be necessary to tape up unused lead wires.

3. If a T.S.L. or marking is not available, obtain the truck model and year and refer to the model application chart which follows the Identification Chart.

IMPORTANT

Always furnish appropriate warranty or rating plate information and DSO number if applicable when ordering parts not listed in the catalog.

WIRING MARKING or TAG NUMBER TO SERVICE WIRING PART NUMBER GUIDE

The purpose of this guide is to facilitate the identification of the Service Wiring Part Number. The chart that follows lists in numerical sequence the Wiring Markings or Tag Numbers. For many vehicles the Service Wiring Part Number will be the same as the Wiring Marking or Tag Part Number. This type of replacement will cause little or no installation problems. However, when the Service Wiring differs from the Wiring Marking or Tag Number it will be necessary to match lead wires and to tape up those lead wires which are not required. This is necessary when the Service Wiring has a more general application than the original wiring installed by the factory.

Following this guide chart, Service Wiring Part Numbers are listed by model year and vehicle usage which will permit the identification of replacement wiring when the wiring identification marking or tag number is not known.

17294 ADAPTER (SPEEDOMETER and TACHOMETER)

HOW TO FIND SPEEDOMETER and TACHOMETER ADAPTERS

There are three ways of determining the part number of a speedometer or tachometer adapter.

BY PHYSICAL SHAPE, IDENTIFICATION or BY APPLICATION

BY PHYSICAL SHAPE

YOU MUST KNOW–
- Physical shape
- Ratio

BY IDENTIFICATION

YOU MUST KNOW–
- Identification number

EXAMPLE

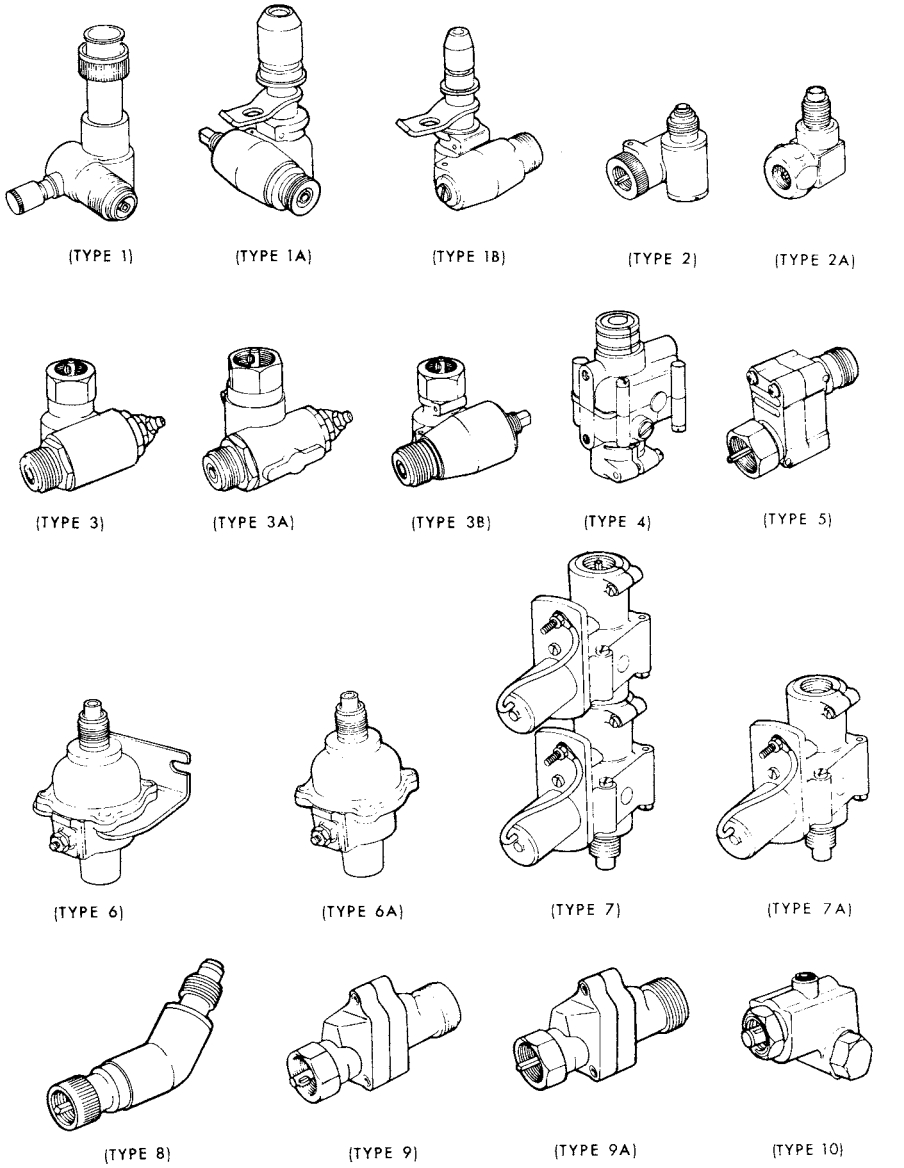
Physical shape conforms to–
TYPE–9A
RATIO–1.11
IDENTIFICATION NUMBER–D2TA 17294–AA or 777–AL
PART NUMBER listed is–D2TZ 17294–A

BY APPLICATION

	SPEEDOMETER ADAPTER	TACHOMETER ADAPTER
YOU MUST KNOW–	Year	Year
	Model	Model
	Transmission	Engine
	Ratio	Ratio
	Single or Two Speed Axle	Location

EXAMPLE

SPEEDOMETER ADAPTER	TACHOMETER ADAPTER
YEAR–1973	YEAR–1973
MODEL–LN750	MODEL–L900 – – line haul instrument panel
TRANSMISSION–AT–540	ENGINE–Detroit 8V–71
RATIO–1.11 to 1	RATIO–1.05 to 1
SINGLE or TWO SPEED AXLE–Single	LOCATION–Located on cowl
PART NUMBER listed is–D2TZ 17294–A	PART NUMBER listed is–D0HZ 17294–D



SPEEDOMETER and TACHOMETER GEAR ADAPTERS P10684

17271 SPEEDOMETER GEARS (DRIVE and/or DRIVEN)

HOW TO FIND SPEEDOMETER DRIVE and DRIVEN GEAR PART NUMBERS

There are two ways of determining the part number of a speedometer drive or driven gear.

BY IDENTIFICATION or BY APPLICATION

BY IDENTIFICATION

YOU MUST KNOW– Physical shape
Number of teeth
Identification number – Listed on Truck Specification List (T.S.L.) or stamped on physical part

EXAMPLE

DRIVEN GEAR (17271 or 17322)

Physical shape conforms to–
TYPE–7
IDENTIFICATION NUMBER–
C8HA 17322–H or 890129
NUMBER OF TEETH–16
PART NUMBER listed is–C8HZ 17322–H

DRIVE GEAR (17285)

Physical shape conforms to–
TYPE–9
IDENTIFICATION NUMBER–
C8HA 17285–C or 447661
NUMBER OF TEETH–6
PART NUMBER listed is–C8HZ 17285–C

78

YOU MUST KNOW– Year
Transmission
Rear axle Ratio
Tire Size

	EXAMPLE
YEAR–	1973
TRANSMISSION–	Fuller RT–610
REAR AXLE RATIO–	5.83 to 1
TIRE SIZE–	10 x 22

DRIVE GEAR part number listed is C8HZ 17285–C

DRIVEN GEAR part number listed is C8HZ 17322–H

17271–17322 SPEEDOMETER GEAR – DRIVE and DRIVEN

1. Locate gears by using the truck specification list (T.S.L.)
   a. Find the part number of the speedometer driving gear or speedometer driven gear as listed on the T.S.L.
   b. Use the T.S.L. Cross–reference Guide below to find the gear service part numbers needed.
2. Locate gears by using the Transmission Index.
   a. Use the transmission index on page 14 to find the page which covers the transmission on the truck you are repairing.
   b. Turn to the page for that transmission find the proper axle ratio and tire size, then locate the gear service part numbers.

SPEEDOMETER GEAR COMBINATIONS

For multi-speed axle speedometer gear selection use lowest numerical axle ratio. Refer to group 17294 if speedometer adapter is required

18124–5 SHOCK ABSORBER KIT (FRONT or REAR)

SHOCK ABSORBER IDENTIFICATION CHART

The production number is stamped on the barrel of each shock absorber as an identification marking. The following chart will provide quick identification of the service kit number when the identification marking is known. Also shock abosrber kits may be selected by model, year and description under group numbers 18124 and 25 which follow the chart. Shock absorber kits include insulators, bolts, nuts and washers.

19C705–8 REFRIGERANT LINE REPLACEMENT and REPAIR PARTS

To simplify part number determination and complexity and to reduce look–up time for air conditioning hoses the following summary describes the various service methods:

1. Hose originally used in production is serviced.

Example: Original production part number D0HA 19972–AD is supplied for service as part number D0HZ 19972–H as shown on page 10 of the IDENTIFICATION CHART and on page 9 of the APPLICATION CHART.

2. Hose originally used in production is not supplied for service and has been replaced by detail parts i.e. bulk hose (which must be cut to length) and assorted fittings.

Detail parts include:
Push–on type tube fittings (includes clamps and "o" rings) and bulk hose. Original production hose assemblies are fabricated from bulk hose (cut to length indicated) and add necessary fittings (listed by code number and cross–referenced to part number on page 16).

Example: Original production part number D0HA 19867–AL is replaced by 29 inches of 5/8" I.D. bulk hose (part number D2AZ 19C708–D) and one each of fitting code G56 which cross–references to fitting service part number D2AZ 19D695–AD and fitting code ZE6 which cross–references to fitting service part number D2AZ 19D695–CE. The original production part number D0HA 19867–AL is shown on page 10 of the IDENTIFICATION CHART and on page 7 of the APPLICATION CHART. The fitting code number to part number CROSS–REFERENCE CHART is shown on pages 16 thru 18

Air Conditioning hose information is listed as follows:

	PAGE
INSTALLATION INSTRUCTIONS	2 through 5
APPLICATION CHART	6 through 9
IDENTIFICATION CHART	10 through 11
FITTING CROSS–REFERENCE CHART	11 through 18

More detailed instructions are included with the IDENTIFICATION CHART, APPLICATION CHART and FITTING CROSS–REFERENCE CHART.

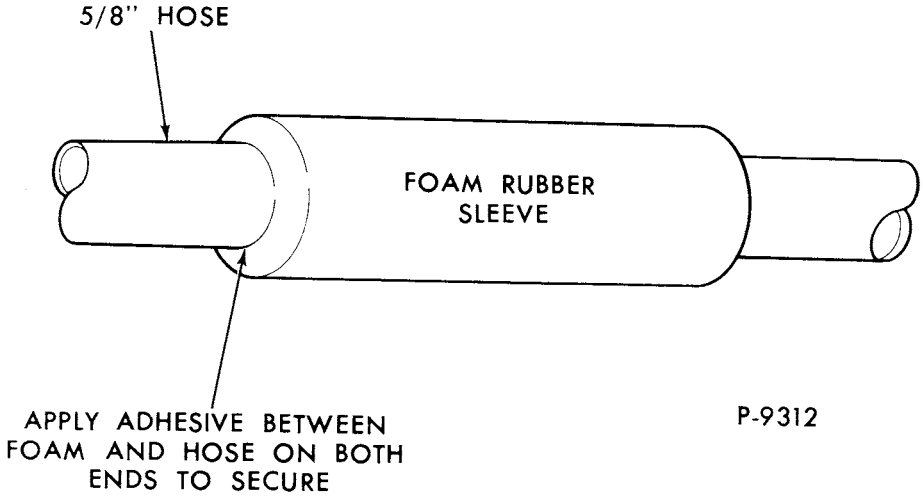
19C705—8 REFRIGERANT LINE REPLACEMENT and REPAIR PARTS cont'd.

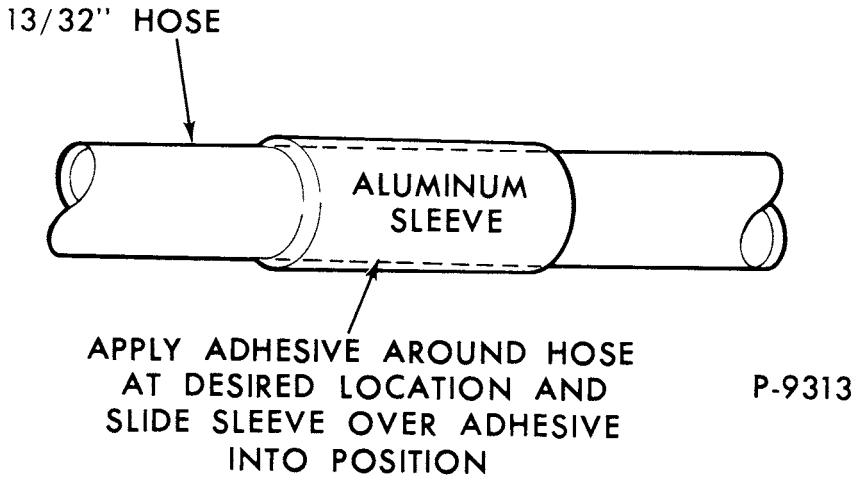
INSTALLATION INSTRUCTIONS

HOSE GUARDS

FOAM RUBBER SLEEVE: To protect 5/8" rubber air conditioner hose from direct rubbing against other parts and to reduce hose vibration noise.



ALUMINUM SLEEVE: To protect 13/32" discharge hose where hose contacts sharp edges in routing through the radiator side support.



1. Slide sleeve on hose before installing end fittings.
NOTE: Sleeve can be cut lengthwise and formed around other hose sizes.

2. Use C0AZ 19552–A or 8A 19552–B adhesive to secure sleeve in desired position.

19C705—8 REFRIGERANT LINE REPLACEMENT and REPAIR PARTS cont'd.

INSTALLATION INSTRUCTIONS – continued

DETAIL PARTS and HOSE ASSEMBLIES

1. Note defective hose routing before removal.

2. Repair existing rubber or nylon hose on vehicle if feasible.

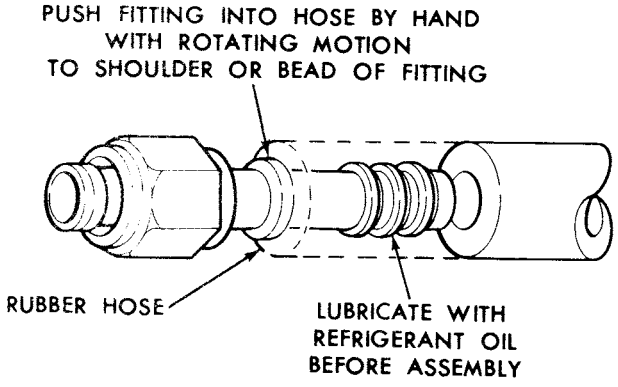
   a. Repair cuts and similar failures, in otherwise sound existing hose assemblies, by using one push–on hose splicer or two splicers with required length of bulk hose.

3. Remove defective hose if splicing is not acceptable.

   a. Discharge the system if not completely discharged, following the procedure outlined in the shop manual.

   b. For those liquid lines (5/16" I.D.) having a self–sealing, quick disconnect coupling on one end, the coupling should be left on the vehicle. The new hose assembly will adapt into this coupling with 1/2"–20 male thread and an external o–ring seal.

4. Assemble the new hose as shown below if component parts are used.

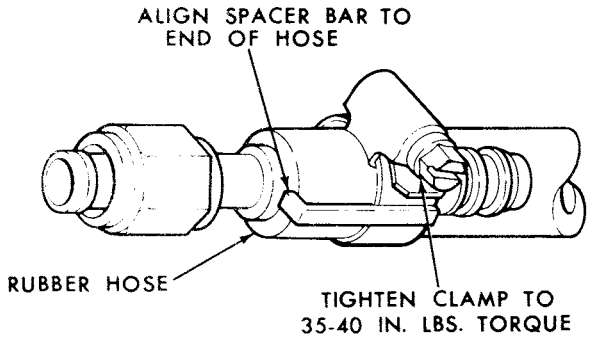


P-9309

   a. Select proper end fittings, splicers, hose guards, and hose size required to replace the original hose assembly. A visual comparison is required for applications not listed.

   b. Cut hose to required length. Keep ends square and remove loose fragments.

   c. Lubricate barbed end of fittings and splicers with a few drops of clean refrigerant oil.



P-9310

   d. Slide loose clamps on hose, force fittings into hose (by hand) with rotating motion.

      CAUTION: Do not go past shoulder or scratch fitting with tools, this fitting must be inserted by hand.

   e. Position clamp so that spacer tab is over end of rubber hose and tighten until clamp starts to cut hose (Tighten to 35–40 in. lbs. torque)

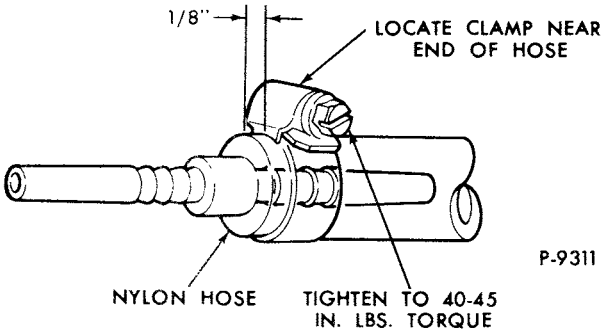
19C705–8 REFRIGERANT LINE REPLACEMENT and REPAIR PARTS cont'd.

INSTALLATION INSTRUCTIONS – continued

DETAIL PARTS and HOSE ASSEMBLIES – continued



f. For nylon hose splicers only, position clamp approx. 1/8" from end of hose (tighten to 40–45 in. lbs. torque)

5. Route the new hose, using the original installation as a guide.
If simplified hose with aluminum tubing and splicer is used, bend the tubing as outlined below:

a. Bend the aluminum tubing by hand to replace the bends of the original hose, making the bends as simple as possible.

b. Drill new holes through the radiator support and side shield as required to make the installations using simplified tube bends.

6. Install and torque new hose assembly.
NOTE. When installing assembly, tighten coupling nut finger tight, then torque per chart below using a back–up tube wrench. Further tightening may distort fitting and result in an imperfect seal. Be sure that o–ring is in place on o–ring type fittings. Hoses must be installed with no twist in them.

Fitting Size or Description	Thread Size	RECOMMENDED TORQUE (IN FT. LBS.)	
		O–RING Type	Flare Type
3/8"	5/8"–18	11–13	15–19
1/2"	3/4"–16 or 18	15–20	21–27
5/8"	7/8"–14 or 18	21–27	25–31
3/4"	1 1/16"–14 or 18	28–33	33–40
Adapter for Self–sealing Coupling	1/2"–20 7/8"–20	8–12 21–27	
Compressor fitting and service valve	1"–14	20–40	
Block fitting plate bolt		20–30	
Pressure relief valve (into block) fitting	3/8"–24	4–11	

7. Rework the existing hose support clamps if required
a. Check for correct installation and proper routing for clearance with other vehicle components.
b. Evacuate, charge and leak test the system following the procedure outlined in the vehicle shop manual

19C705–8 REFRIGERANT LINE REPLACEMENT and REPAIR PARTS cont'd.

APPLICATION CHART

To determine the correct hose part number or detail part numbers you must know:

1. Series (LN750, W–WT900. etc.)
2. Year (1973)
3. Hose function (Discharge Line, Liquid Line or Suction Line)
4. Type of Air Conditioning System (Hang–on or Integral)
5. Engine (number of cylinders and cubic inch displacement)

Example No. 1: If a Discharge Line is required for a 1973 W900 – – Cum. V903 Diesel with integral air conditioning the Application Chart(on page 8) indicates (1) that the hose assembly is not serviced (★) and (2) that you must fabricate the hose from – 68" of 13/32" I.D. bulk hose (Part Number D2AZ 19C708–B). and two pieces of Fitting Code A44 (Part Number D2AZ 19D695–E).

Example No. 2: If a Liquid Line is required for a 1973 LN800 with integral air conditioning the Application Chart (on page 7) indicates (1) that the hose assembly is serviced as D0HZ 19862–A (original production hose) and part number D0HZ 19863–A (original production hose) and (2) that the hose cannot be fabricated from bulk hose and assorted fittings.

Example No. 3. If a Suction Line is required for a 1973 W–WT900 with Detroit 6–71 Diesel with integral air conditioning the Application Chart (on page 8) indicates (1) that the hose assembly is serviced as part number D0HZ 19919–E (original production hose) and (2) that the hose may be fabricated from – 132" of 1/2" I.D. bulk hose (Part Number D2AZ 19C708–C) and two pieces of Fitting Code A55 (Part Number D2AZ 19D695–F).

19C705–8 REFRIGERANT LINE REPLACEMENT and REPAIR PARTS cont'd.

To determine the correct hose part number or detail part numbers you must either:

1. Know the identification number from the existing hose.
   or
2. Be able to visually identify the existing hose and select appropriate details from the Fitting Cross–Reference Chart shown on pages 14 thru 16.

Example No. 1: If the identification number is D0HA 19972–AF, the Identification Chart (on page 11) indicates (1) that the service assembly number is D0HZ 19972–K and (2) that the hose may be fabricated from–74" of 13/32" I.D. bulk hose (part number D2AZ 19C708–B), one piece of Fitting Code A44 (part number D2AZ 19D695–E) and one piece of Fitting C44 (part number D2AZ 19D695–N).

Example No. 2: If the identification number is D0HA 19867–AJ, the Identification Chart (on page 11) indicates the hose assembly is not serviced (★) and that the hose must be fabricated from 34" of 5/8" I.D bulk hose (part number D2AZ 19C708–D), one piece of Fitting Code G56 (part number D2AZ 19D695–AD) and one piece of Fitting Code ZE6 (part number D2AZ 19D695–CE).

19C705–8 REFRIGERANT LINE REPLACEMENT and REPAIR PARTS cont'd.

FITTING CROSS–REFERENCE CHART

There are three ways of selecting hose and fitting part numbers.

1.From Code Number (shown in the Identification or Application Charts) to the Part Number listed below.
2. From a visual inspection of the existing hose and selection of appropriate details using the following instructions:
a. Determine Fitting Size.
Diameter of tube at a point behind the nut indicates fitting size, e.g. 3/8", 1/2", 5/8" or 3/4".

Select Fittings and Splicers from the illustrations and text that follows. The necessary clamps and o–rings are included with all Fittings and Splicers and are also supplied for service as separate parts.

FITTINGS

Determine Fitting size from the information shown below:

ORIGINAL TUBE O.D.	FRACTIONALY FITTING SIZE	INDUSTRY SIZE NO.	THREAD SIZE SAE 45° FLARE O–RING (FEMALE) O–RING (MALE FLARE)	THREAD SIZE O–RING (MALE SWIVEL)
5/16"	3/8"	6	5/8"–18	5/8"–18
13/32"	13/32"	8	3/4"–16	3/4"–18
1/2"	5/8"	10	7/8"–14	7/8"–18

b.Determine Hose Size
e.g. tube O.D. is 5/16" and hose I.D. is 5/16" (size No. 6, part number D2AZ 19C708–A).
Measure end of tube (not barbs). The tube O.D. matches the I.D. of the required hose

BULK RUBBER HOSE

Select the appropriate hose from the sizes listed below:

ORIGINAL TUBE O.D.	REPLACEMENT HOSE I.D.	INDUSTRY SIZE NO.	PART NUMBER	MOTORCRAFT NUMBER
5/16"	5/16"	6	D2AZ 19C708–A (15')	*YF–248
			D4AZ 19C708–A (50')	*YF–599
13/32"	13/32"	8	D2AZ 19C708–B (15')	*YF–249
			D4AZ 19C708–B(50')	*YF–600
1/2"	1/2"	10	D2AZ 19C708–C(15')	*YF–250
			D4AZ 19C708–C(50')	&YF–601
5/8"	5/8"	12	D2AZ 19C708–D(15')	*YF–251
			D4AZ 19C708–D(50')	*YF–602

PART NAME	GROUP NUMBER
A	
Adjuster (front door latch actuating rod)	21816
Adjuster handle kit (front seat)–driver	620A69
Air spring kit (front seat)–driver	620A68
Arm (front seat height adjusting)–driver	620A44
Arm (front seat suspension equalizer)–driver	620A00–1
Arm assy. (body side front rear shock)	27200
Arm & bracket assy. (visor)	04144–5
B	
Bar (back window division)	42076
Bar (floor pan foot rest)	12002
Bar (front door vent window division)	22296–7
Bar (front seat adjusting front torsion)	617A24
Bar (front seat adjusting rear torsion)	617C62
Bar (front seat suspension torsion)–driver	62039
Bar (windshield division)	03162
Bar assy. (cowl)	02402
Base (front seat suspension)–driver	62036–7
Base assy. (front seat suspension complete)–driver	61738
Bearing (body pivot on body)	00254–5
Bearing (front seat shock absorber)–driver	620A48–50
Bearing (front seat shock absorber lever)–driver	60325
Bearing (front seat weight adjusting lever)–driver	620A46
Bearing & lever assy. (front seat suspension)–driver	618A63
Belt (sleeping compt. complete)	46892
Belt assy. (front seat complete)	611A72
Belt assy. (front seat complete center)	611B60
Belt & buckle assy. (sleeping compt.)	46830
Bezel (front seat back latch handle)	62672
Bolt (front seat back pivot arm)	60392
Bolt (front seat belt anchor eye)	61212
Bolt (front seat suspension)–driver	62065
Bow (roof trim panel support center)	51952–5
Bow (roof trim panel support side)	51952–5
Brace (back panel strainer to back window frame)	40264–5
Brace (body side panel front)	28260
Brace (body side panel rear)	27726
Brace (brake pedal support)	01524
Brace (cowl side panel)	020A62
Brace (dash panel to frame)	01726–7
Brace (front body pillar)	02582
Brace (instrument panel to dash)	044F48
Brace (side step)	200L52
Brace (trans. control selector to dash extension)	12208–9
Bracket (air scoop roof front)	50738
Bracket (body door check on door)	27218
Bracket (back panel trim panel)	403D50
Bracket (body front air deflector upper)	001A10–1
Bracket (body lift)	00334
Bracket (body rear cross member reinforcement)	403E08
Bracket (body side panel lower)	29348–9
Bracket (body side step)	29400–1
Bracket (body side step hinge)	200A08–9
Bracket (clutch pedal assist spring)	01526
Bracket (cowl bar)	021A88
Bracket (cowl bar support)	024A18

ORDERING INSTRUCTIONS for
C-CL-CLT-CT-F-L-LN-LNT-LS(DSO)-LT-LTL(DSO)-LTS-W-WT Series Cabs

Cabs are available through current production and must be ordered in accordance with the instructions which follow

MODEL APPLICATION

(1979) F600/800 cabs are not interchangeable with 1973, 1974, 1975, 1976, 1977 and 1978 chassis frames. Refer to page 3 for past model F Series service cab part numbers.

C-CT-F SERIES

EXTERIOR PAINT COLORS

Cabs are available in prime and current production paint colors for U.S. and in prime only for Canada. D.S.O. colors are not available. These cabs must be ordered in an alternative color, and the stripes, etc., must be added locally.

The following chart lists the 1973, 1974, 1975, 1976, 1977 or 1978 colors and codes as well as the corresponding color and code for 1979. In certain instances the same color and/or code is used in all years, in other instances, the original 1973, 1974, 1975, 1976, 1977 or 1978 color is no longer available and it will be necessary to select an alternative color.

CL-CLT SERIES

Service cabs for the CL-CLT series are equipped with standard cab mountings. If the parts on the original cab are for the Easy Riding Cab Air Suspension System and are not reuseable, the following parts must be ordered as required.

Qty. Req'd.	Part Number	Description
1	D8HZ 5A118-F	Bracket (cab forward hinge) - R.H.
1	D8HZ 5A118-H	Bracket (cab forward hinge) - L.H.
2	D8HZ 5B404-A	Bracket assy. (cab mounting to spring)
2	D8HZ 5B406-A	Gusset (cab mounting spring bracket)
2	D8HZ 5411-B	Bracket (cab to frame suspension arm)

In all instances when the truck is equipped with the Easy Riding Cab Air Suspension System, parts unique to the standard cab must be replaced by either the corresponding original or a new service replacement part. All cabs have pre-drilled holes in the sub-frame for both types of cab mountings.

SKELETON CABS

The following skeleton cabs are currently available for service. These skeleton cabs are primed and include doors, they do not include glass or trim.

BODY BOLT CHART

INSTRUCTIONS

Truck bodies for Conventional Cabs (body type 81) are assembled to the frame by various bolts and related parts.

The illustrations on the next page show a typical example of a Conventional Cab frame. The body bolt locations are numbered consecutively beginning at the cowl from 1 to 6 as required. For quick identification the related parts used at each location are arranged alphabetically as follows:

Absorbers Bolts Insulators Nuts Retainers Washers

TO USE BODY BOLT CHART

1) Determine the location of the parts required by referring to the illustrations.

2) Select the necessary parts listed for each location.

For example:
To find the parts necessary to install a 1973 L 800 Conventional Cab at the front mount:

1) Refer to the illustration and determine that the front mount is the No. 1 Location.

2) Refer to the chart under Body Bolt Location No. 1.

3) The parts required are:

NAME	PART NUMBER		PART NUMBER
Bolt	58687–S2	Spacer	D0HZ 5000130–A
Insulator	D0HZ 8000149–A	Washer–flat	44735–S8
Nut–hex. 1/8"–13	55697–S8	Washer–flat–9/16"	374049–S
Spacer	NS – improvise		

PARTS NOT AVAILABLE FOR SERVICE

Parts identified by a black star ★ are not available for service and must be improvised or procured locally.

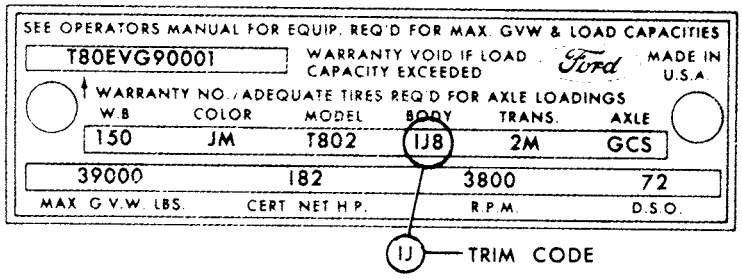
NEW ISSUE

INSTRUCTIONS

Determine correct Group Number by referring to an appropriate illustration in the Interior Trim Section of the Illustration Catalog, Form FP 8097–A or to the Soft Trim Index of this catalog. Identify Model, Body Type and Trim Code by referrring to 1973 Warranty Rating Plate Codes.



REFER TO THE CODES LISTED ON THE FOLLOWING PAGES AND USE THESE CODES TO DETERMINE SEAT COVER PART NUMBERS. ALSO REFER TO THE GENERAL INFORMATION SECTION OF THIS CATALOG FOR INTERPRETATION OF BODY TYPE CODES.

P-8280

The 1973 Soft Trim Catalog consists of
(1) Trim Scheme Codes (pages 2 thru 4) and Swatches (Pages B, C and D)
(2) Listing of Soft Trim Parts for all Truck Series 600/900

TRIM SCHEME CODES and SWATCHES

Consists of:
(1) Listing of Trim Scheme Codes arranged in order of series and body types i.e. C–CT600/900(91A,91B) etc.
(2) Colored Swatches identified by a number beside the swatch.
How to use:
(1) Identify Body Type and Trim Code and apply this information to listing of Trim Scheme Codes.
(2) Determine Swatch Identification Numbers and refer to Colored Swatches on Page B, etc.
(3) Locate appropriate swatches to verify the color and/or pattern of the principle materials used.

Colored Swatch pages are primarily for verification of color and/or pattern and do not indicate the type or weight of material.
For example, to determine which Swatches make up Trim Code 12 on C–CT600/900 (91A) refer to Page 2. As shown on Page 2, C–CT600/900 (91A) Trim Code 12 indicates Bolster material (Swatch No. 16) and cushion and back material (Swatch No. 27).

SOFT TRIM PARTS for ALL TRUCK SERIES 600/900

Consists of:
(1) Parts cataloged by color (e.g. groups 04104, 04282, etc.).
(2) Parts cataloged by trim code (e.g. groups 62900,64416–7 etc.)
(3) Miscellaneous parts (e.g. groups 51990,60050 etc.)

PARTS CATALOGED BY COLOR:
(1) Identify Body Type and Color of desired part.
(2) Determine Group Number of part.
(3) Locate appropriate Color listed at top of page.
(4) Match Color with Body Type to select desired part number.

For example, should a Blue Sun Visor(group number 04104) be desired for an F600
(1) Refer to group 04104
(2) Read list of Colors above title to find Blue
(3) Read down to find F600/750
(4) Part number shown is D3TZ 1004104 and suffix "Blue" column is E

PARTS CATALOGED BY TRIM CODE:
(2) Determine Group Number of part.
(3) Locate appropriate Trim Code (listing of Trim Codes precedes each Body Type).
(4) Match Series and Body Type with Trim Code to select part number.

For example, should a R.H. Front Door Trim Panel (Group 23942) be required for a 1973 F600 Trim Code 52
(1) Refer to Group 23942–3
(2) Read down to locate F600/750
(3) Read trim codes (listed numerically) to find Trim Code GE
(4) Part number shown is D3TZ 1023942 and suffix listed is E.

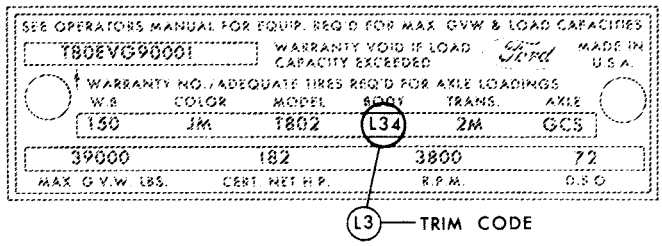
INSTRUCTIONS

Determine correct Group Number by referring to an appropriate illustration in the Interior Trim Section of the Illustration Catalog, Form FP 8097–A or to the Soft Trim Index of this catalog. Identify Model, Body Type and Trim Code by referring to 1974 Warranty Rating Plate Codes.



REFER TO THE CODES LISTED ON THE FOLLOWING PAGES AND USE THESE CODES TO DETERMINE SEAT COVER PART NUMBERS. ALSO REFER TO THE GENERAL INFORMATION SECTION OF THIS CATALOG FOR INTERPRETATION OF BODY TYPE CODES.

P-8280

The 1974 Soft Trim Catalog consists of
(1) Trim Scheme Codes (pages 2 thru 4) and Swatches (Pages B, C and D)
(2) Listing of Soft Trim Parts for all Truck Series 600/900

TRIM SCHEME CODES and SWATCHES

Consists of:
(1) Listing of Trim Scheme Codes arranged in order of series and body types i.e. C–CT600/900 (91A,91B) etc.
(2) Colored Swatches identified by a number beside the swatch.
How to use:
(1) Identify Body Type and Trim Code and apply this information to listing of Trim Scheme Codes.
(2) Determine Swatch Identification Numbers and refer to Colored Swatches on Page B, etc.
(3) Locate appropriate swatches to verify the color and/or pattern of the principle materials used.

Colored Swatch pages are primarily for verification of color and/or pattern and do not indicate the type or weight of material.
For example, to determine which Swatches make up Trim Code 12 on C–CT600/900 (91A) refer to Page 2. As shown on Page 2, C–CT600/900 (91A) Trim Code 12 indicates Bolster material (Swatch No. 16) and cushion and back material (Swatch No. 27).

SOFT TRIM PARTS for ALL TRUCK SERIES 600/900

Consists of:
(1) Parts cataloged by color (e.g. groups 04104, 04282, etc.).
(2) Parts cataloged by trim code (e.g. groups 62900, 64416–7, etc.).
(3) Miscellaneous parts (e.g. groups 51990, 60050, etc.).

PARTS CATALOGED BY COLOR:
(1) Identify Body Type and Color of desired part.
(2) Determine Group Number of part.
(3) Locate appropriate Color listed at top of page.
(4) Match Color with Body Type to select desired part number.

For example, should a Blue Sun Visor (group number 04104) be desired for an F600
(1) Refer to group 04104
(2) Read list of Colors above title to find Blue
(3) Read down to find F600/750
(4) Part number shown is D3TZ 1004014 and suffix in "Blue" colum is E.

PARTS CATALOGED BY TRIM CODE:
(1) Identify Series, Body Type and Trim Code.
(2) Determine Group Number of part.
(3) Locate appropriate Trim Code (listing of Trim Codes. precedes each Body Type).
(4) Match Series and Body Type with Trim Code to select part number.

For example, should a R.H. Front Door Trim Panel (Group 23942) be required for a 1974 F600 Trim Code 53
(1) Refer to Group 23942–3
(2) Read down to locate F600/750 (81A)
(3) Read trim codes (listed numerically) to find Trim Code 53.
(4) Part number shown is D4TZ 1023942 and suffix listed is E.

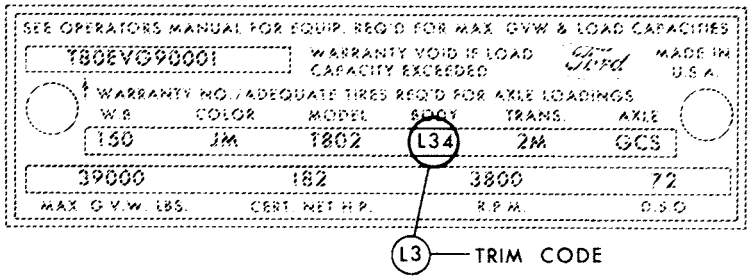
INSTRUCTIONS

Determine correct Group Number by referring to an appropriate illustration in the Interior Trim Section of the Illustration Catalog, Form FP 8097–A or to the Soft Trim Index of this catalog. Identify Model, Body Type and Trim Code by referring to 1975 Warranty Plate Codes.



REFER TO THE CODES LISTED ON THE FOLLOWING PAGES AND USE THESE CODES TO DETERMINE SEAT COVER PART NUMBERS. ALSO REFER TO THE GENERAL INFORMATION SECTION OF THIS CATALOG FOR INTERPRETATION OF BODY TYPE CODES.

P-8280

The 1975 Soft Trim Catalog consists of
(1) Trim Scheme Codes (pages 2 thru 4)
(2) Listing of Soft Trim Parts for all Truck Series 600/900

TRIM SCHEME CODES

Consists of:
(1) Listing of Trim Scheme Codes arranged in order of series and body types i.e. C–CT600/900 (91A) etc.
(2) Description of Trim Scheme and Type of Seat.
How to use: Identify Body Type and Trim Code and apply this information to listing of Trim Scheme Codes. (For material identification refer to salesman's Color and Trim Selection Guide).

For example, to determine Trim Scheme for Trim Code 12 on C–CT600/900 (91A) refer to Page 2. As shown on Page 2, C–CT600/900 (91A) Trim Code 12 indicates: (1) Trim scheme description (Light gray vinyl and multicolor stripe plastic. (2) Type of seat (Full width).

SOFT TRIM PARTS for ALL TRUCK SERIES 600/900

Consists of: (1) Parts cataloged by color (e.g. groups 04104, 04282, etc.)
(2) Parts cataloged by trim code (e.g. groups 62900, 64416–7, etc.).
(3) Miscellaneous parts (e.g. groups 51990, 60050, etc.).

PARTS CATALOGED BY COLOR
(1) Identify Body Type and Color of desired part.
(2) Determine Group Number of part.
(3) Locate appropriate Color listed at top of page.
(4) Match Color with Body Type to select desired part number.

For example, should a blue sun visor (group number 04104) be desired for an F600
(1) Refer to group 04104
(2) Read list of Colors above title to find Blue
(3) Read down to find F600/750
(4) Part number shown is D3TZ 1004014 and suffix in "Blue" column is E.

PARTS CATALOGED BY TRIM CODE:
(1) Identify Series, Body Type and Trim Code.
(2) Determine Group Number of part.
(3) Locate appropriate Trim Code (listing of Trim Codes precedes each body Type.)
(4) Match Series and Body Type with Trim Code to select part number.

For example, should a R.H. Front Door Trim Panel (Group 23942) be required for a 1974 F600 Trim Code 53
(1) Refer to Group 23942–3
(2) Read down to locate F600/700 (81A)
(3) Read trim codes (listed numerically) to find Trim Code 53.
(4) Part number shown is D4TZ 1023942 and suffix listed is E.

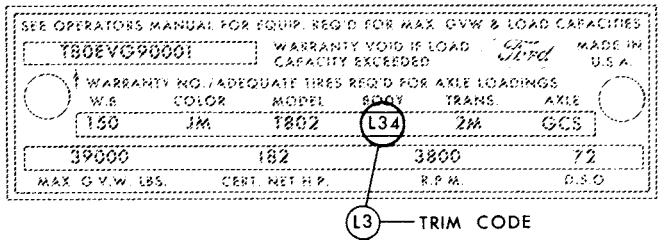
INSTRUCTIONS

Determine correct Group Number by referring to an apporopriate illustration in the Interior Trim Section of the Illustration catalog, Form FP 8097–A or to the Soft Trim Index of this catalog. Identify Model, Body Type and Trim Code by referring to 1976 Warranty Plate Codes.



REFER TO THE CODES LISTED ON THE FOLLOWING PAGES AND USE THESE CODES TO DETERMINE SEAT COVER PART NUMBERS. ALSO REFER TO THE GENERAL INFORMATION SECTION OF THIS CATALOG FOR INTERPRETATION OF BODY TYPE CODES.

P-8280

The 1976 Soft Trim Catalog consists of

(1) Trim Scheme Codes (Pages 2 thru 4)

(2) Listing of Soft Trim Parts for all Truck Series 600/900.

TRIM SCHEME CODES

Consists of:

(1) Listing of Trim Scheme Codes arranged in order of series and body types i.e. C–CT600/900 (91A), etc.

(2) Description of Trim Scheme and Type of Seat.

How to use: Identify Body Type Code and apply this information to listing of Trim Scheme Codes. (For material identification refer to salesman's Color and Trim Selection Guide).

For example, to determine Trim Code 12 on C–CT600/900 (91A) refer to Page 2. As shown on Page 2, C–CT600/900 (91A) Trim Code 12 indicates: (1) Trim scheme description (Light gray vinyl and multicolor stripe plastic). (2) Type of seat (Full width).

SOFT TRIM PARTS for ALL TRUCKS SERIES 600/900

Consists of:

(1) Parts cataloged by color (e.g. groups 04104, 04282, etc.)

(2) Parts cataloged by trim code (e.g. groups 62900, 64416–7. etc.).

(3) Miscellaneous parts (e.g. groups 51990, 60050, etc).

PARTS CATALOGED BY COLOR:

(1)Identify Body Type and Color of desired part.
(2) Determine Group Number of part.
(3) Locate appropriate Color listed at top of page.
(4) Match Color with Body Type to select desired part number.

For example, should a Blue Sun Visor (group number 04104) be desired for an F600

(1) Refer to group 04104
(2) Read list of Colors above title to find Blue
(3) Read down to find F600/750
(4) Part number shown is D3TZ 1004014 and suffix in 'Blue" column is E.

PARTS CATALOGED BY TRIM CODE:

(1) Identify Body Type and Trim Code.
(2) Determine Group Number of part.
(3) Locate appropriate Trim Code (listing of Trim Codes precedes each body Type.)
(4) Match Series and Body Type with Trim Code to select part number.

For example, should a R.H. Front Door Trim Panel (Group 23942) be required for a 1976 F600 Trim Code 53

(1) Refer to Group 23942–3
(2) Read down to locate F600/700(81A)
(3) Read trim codes (listed numerical ly) to find Trim Code 53.
(4) Part number shown is D4TZ 1023942 and suffix listed is E.

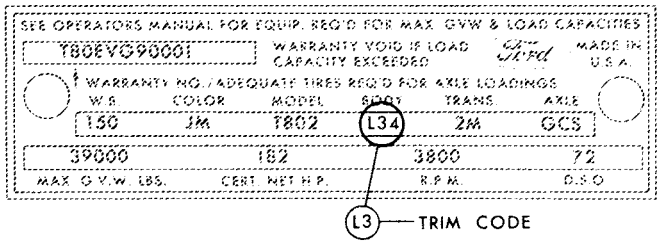
INSTRUCTIONS

Determine correct Group Number by referring to an appropriate illustration in the Interior Trim Section of the Illustration catalog. Form FP 8097–A or to the Soft Trim Index of this catalog. Identify Model, Body Type and Trim Code by referring to 1977 Warranty Plate Codes.



REFER TO THE CODES LISTED ON THE FOLLOWING PAGES AND USE THESE CODES TO DETERMINE SEAT COVER PART NUMBERS. ALSO REFER TO THE GENERAL INFORMATION SECTION OF THIS CATALOG FOR INTERPRETATION OF BODY TYPE CODES.

P-8280

The 1977 Soft Trim Catalog consists of

(1) Trim Scheme Codes (Pages 2 thru 4)

(2) Listing of Soft Trim Parts for all Truck Series 600/900.

TRIM SCHEME CODES

Consists of:

(1) Listing of Trim Scheme Codes arranged in order of series and body types i.e. C–CT600/900 (91A), etc.

(2) Description of Trim Scheme and Type of Seat.

How to use: Identify Body Type Code and apply this information to listing of Trim Scheme Codes. (For material identification refer to saleman's Color and Trim Selection Guide).

For example, to determine Trim Code 12 on C–CT600/900 (91A) refer to Page 2.
As shown on Page 2, C–CT600/900 (91A) Trim Code 12 indicates: (1) Trim scheme description (Light gray vinyl and multicolor stripe plastic). (2) Type of seat (Full width).

SOFT TRIM PARTS for ALL TRUCK SERIES 600/900

Consists of:

(1) Parts cataloged by color (e.g. groups 04104, 04282, etc.)

(2) Parts cataloged by trim code (e.g. groups 62900, 64416–7, etc.).

(3) Miscellaneous parts (e.g. groups 51990, 60050, etc.).

PARTS CATALOGED BY COLOR:

(1) Identify Body Type and Color of desired part.
(2) Determine Group Number of part.
(3) Locate appropriate Color listed at top of page.
(4) Match Color with Body Type to select desired part number.

For example, should a Blue Sun Visor (group number 04104) be desired for an F600

(1) Refer to group 04104
(2) Read list of Colors above title and Blue
(3) Read down to find F600/750
(4) Part number shown is D3TZ 1004014 and suffix in "Blue" column is E.

PARTS CATALOGED BY TRIM CODE:

(1) Identify Body Type and Trim Code.
(2) Determine Group Number of part.
(3) Locate appropriate Trim Code (listing of Trim Codes precedes each body Type.)
(4) Match Series and Body Type with Trim Code to select part number.

For example, should a R.H. Front Door Trim Panel (Group 23942) be required for a 1977 F600 Trim Code DR

(1) Refer to Group 23942–3
(2) Read down to locate F600/700(81A)
(3) Read trim codes (listed numerically) to find Trim Code DR.
(4) Part number shown is D7TZ 1023942 and suffix listed is B.

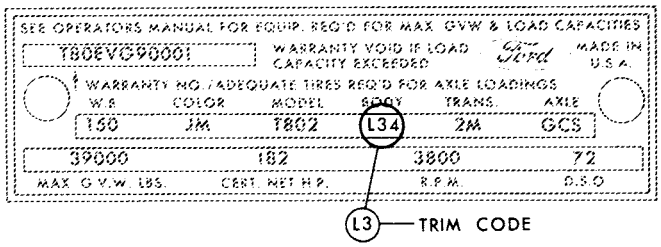
INSTRUCTIONS

Determine correct Group Number by referring to an apporopriate illustration in the Interior Trim Section of the Illustration catalog, Form FP 8097–A or to the Soft Trim Index of this catalog. Identify Model, Body Type and Trim Code by referring to 1978 Warranty Plate Codes.



REFER TO THE CODES LISTED ON THE FOLLOWING PAGES AND USE THESE CODES TO DETERMINE SEAT COVER PART NUMBERS. ALSO REFER TO THE GENERAL INFORMATION SECTION OF THIS CATALOG FOR INTERPRETATION OF BODY TYPE CODES.

P-8280

The 1978 Soft Trim Catalog consists of

(1) Trim Scheme Codes (Page 2)

(2) Listing of Soft Trim Parts for Truck Series CL–CLT900.

TRIM SCHEME CODES

Consists of:

(1) Listing of Trim Scheme Codes arranged in order of series CL–CLT900, etc.

(2) Description of Trim Scheme and Type of Seat.

How to use: Identify Body Type Code and apply this information to listing of Trim Scheme Codes. (For material identification refer to salesman's Color and Trim Selection Guide).

For example, to determine Trim Code E6 on CL–CLT900 refer to Page 2. As shown on Page 2, CL–CLT900 Trim Code E6 indicates: (1) Trim scheme description (Red vinyl). (2) Type of seat (Bostrom Levelair).

SOFT TRIM PARTS for ALL TRUCKS SERIES 600/900

Consists of:

(1) Parts cataloged by color (e.g. groups 04104, 04282, etc.)

(2) Parts cataloged by trim code (e.g. groups 23902–3 – 23942–3, etc.).

(3) Miscellaneous parts (e.g. groups 51990, 60050, etc).

PARTS CATALOGED BY COLOR:

(1) Identify Body Type and Color of desired part.

(2) Determine Group Number of part.

(3) Locate appropriate Color listed at top of page.

(4) Match Color with Body Type to select desired part number.

For example, should a Blue Sun Visor (group number 04104) be desired for a CL–CLT900

(1) Refer to group 04104

(2) Read list of Colors above title to find Blue

(3) Read down to find CL–CLT900

(4) Part number shown is D8HZ 9004104 and suffix in "Blue" column is C.

PARTS CATALOGED BY TRIM CODE:

(1) Identify Body Type and Trim Code.

(2) Determine Group Number of part.

(3) Locate appropriate Trim Code (listing of Trim Codes precedes each body Type.)

(4) Match Series and Body Type with Trim Code to select part number.

For example, should a R.H. Front Door Trim Panel (Group 23942) be required for a 1978 CL–CLT900 Trim Code EF

(1) Refer to Group 23942–3

(2) Read down to locate CL–CLT900

(3) Read trim codes (listed numerically) to find Trim Code EF.

(4) Part number shown is D8HZ 9023942 and suffix listed is C.

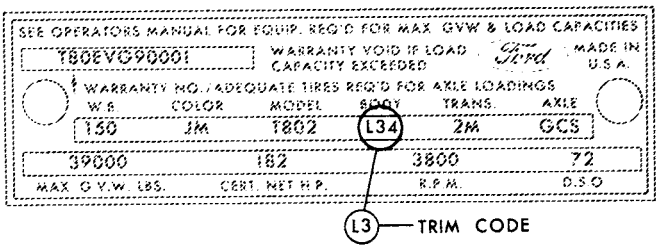
INSTRUCTIONS

Determine correct Group Number by referring to an appropriate illustration in the Interior Trim Section of the Illustration catalog, Form FP 8097–A or to the Soft Trim Index of this catalog. Identify Model, Body, Type and Trim Code by referring to 1979 Warranty Plate Codes.



REFER TO THE CODES LISTED ON THE FOLLOWING PAGES AND USE THESE CODES TO DETERMINE SEAT COVER PART NUMBERS. ALSO REFER TO THE GENERAL INFORMATION SECTION OF THIS CATALOG FOR INTERPRETATION OF BODY TYPE CODES. P-8280

The 1979 Soft Trim Catalog consists of

(1) Trim Scheme Codes (Page 2)

(2) Listing of Soft Trim Parts for Truck Series CL–CLT900.

TRIM SCHEME CODES

Consists of:

(1) Listing of Trim Scheme Codes arranged in order of series CL–CLT900, etc.

(2) Description of Trim Scheme and Type of Seat.

How to use: Identify Body Type Code and apply this information to listing of Trim Scheme Codes. (For material identification refer to salesman's Color and Trim Selection Guide).

For example, to determine Trim Code E6 on CL–CLT900 refer to Page 2. As shown on Page 2, CL–CLT900 Trim Code E6 indicates: (1) Trim scheme description (Red vinyl), (2) Type of seat (Bostrom Levelair).

SOFT TRIM PARTS for ALL TRUCKS SERIES 600/900

Consists of:

(1) Parts cataloged by color (e.g. group 04104, 04282, etc.).

(2) Parts cataloged by trim code (e.g. groups 23902–3 – 23942–3, etc.).

(3) Miscellaneous parts (e.g. groups 51990, 60050, etc.).

PARTS CATALOGED BY COLOR:

(1) Identify Body Type and Color of desired part.

(2) Determine Group Number of part.

(3) Locate appropriate Color listed at top of page.

(4) Match Color with Body Type to select desired part number.

For example, should a Blue Sun Visor (group number 04104) be desired for a CL–CLT900

(1) Refer to group 04104

(2) Read list of Colors above title to find Blue

(3) Read down to find CL–CLT900

(4) Part number shown is D8HZ 9004104 and suffix in "Blue" column is C.

PARTS CATALOGED BY TRIM CODE:

(1) Identify Body Type and Trim Code.

(2) Determine Group Number of part.

(3) Locate appropriate Trim Code (listing of Trim Codes precedes each body Type.)

(4) Match Series and Body Type with Trim Code to select part number.

For example, should a R.H. Front Door Trim Panel (Group 23942) be required for a 1979 CL–CLT900 Trim Code EF

(1) Refer to Group 23942–3

(2) Read down to locate CL–CLT900

(3) Read trim codes (listed numerically) to find Trim Code EF.

(4) Part number shown is D8HZ 9023942 and suffix listed is C.
