Model Index - Short Block	6
Appendix A. Notes	51
Appendix B. Short Block History	52
Appendix C. Cross-Reference Tables	53

Introduction

This guide is prepared in alphabetical sequence by model series. Example: AJ series, AK series, B43E series. Within the alphabetical sequence the models are in alphabetical/numerical sequence. Example: 1.5AJ-1P/1, 2.5AJ-1R/1, 2.5AJ-1R/13. Note, however, that sometimes genset models precede and sometimes they follow engine models for a given series.

Short Block Definition

Generally, an Onan short block includes the crankcase or cylinder block proper, all bearings, crankshaft, camshaft, timing gears, connecting rod(s), piston(s) and rings, valve train, and oil pump. It excludes flywheel, ignition system, charging system, oil base, cylinder heads, oil fill tube and indicator, muffler or exhaust manifold, carburetor, choke, air cleaner, fuel tank, oil pickup tube and cup assembly, valve covers, gearcase cover, necessary studs and gaskets, sheet metal parts such as blower housing, and accessories such as starters.

Some notable exceptions are:

1. J Series: excludes valve train; typically includes gearcase cover.
2. AJ Series: includes gearcase cover.
3. Elite Series: excludes valve train.
4. KY Series: excludes valve train; includes oil base.

Additional Information for Using Index

1. When available, genset replacement engines (100-xxxx) are listed in place of short blocks (110-xxxx). Replacement engines for non-Onan manufactured engines are typically supplied with all components as vendor purchased.
2. Model Identification:

Generator Set: 5.0CCK-3CR/8672 \longrightarrow 5.0 CCK-3CR / 8672J
A B C D

Industrial Engine: CCK-MS/2735J \longrightarrow CCK-MS / 2735J
B C D

- A. kW Rating
- B. Model
- C. Diagonal line separating Model and Specification
- D. Specification

3. When no specification (spec) number or letter is shown after the model, the short block or replacement engine will work for all spec numbers and/or spec letters.
4. Prior to 1969, a decimal was not used in the kW rating. All models are listed in the Index using the decimal system. Example: 6.0CCK was formerly 6CCK.

NOTE: When installing a short block, a complete engine gasket kit must also be ordered. The above list includes complete gasket kits only plus parts unique to the model or application. The kit might contain gaskets or seals not applicable to your original engine. Order quantity of one unless specified otherwise. For additional gasket information and models not listed, see Parts Manual for specific model.

Appendix A

Notes:

1. Reference: Service Parts Bulletin No. 66
2. Internally splined crankshaft replaces tapered crankshaft in applications where all power is taken from blower wheel end.
3. Requires 541-0374 SAE "B" hydraulic pump mounting adapter kit.
4. Requires 541-0344 SAE "A" hydraulic pump mounting adapter kit.
5. Reference: Service Parts Bulletin No. 65.
6. Key/keyslot on rear crankshaft PTO stub eliminated by welder manufacturer.
7. Reference: Service Parts Bulletin No. 33.
8. No oil pump.
9. Requires 123-1898 breather kit.
10. Recondition and use gearcase cover assembly from original engine.
11. Might require housing mounted coil.
12. S/N H760159788 or lower: Use 110-3422-11
S/N H760159789 or higher: Use 110-3422-21
13. Contact local Cummins Engine Company distributor or dealer. Replacement engine is not available from Onan Parts and must be ordered through Cummins Parts System.
14. B43M, except Case/Ingersoll: Use 110-3823-01
B48M, except Case/Ingersoll: Use 110-3824-02
Case/Ingersoll B43M/B48M: Use 110-3824-05
Reference: Service Parts Bulletin No. 66
15. For units manufactured after 1993.

Appendix B

SHORT BLOCK HISTORY

Short blocks are designed to allow the latest design to service older engines. The short block you receive may have an updated breather system, piston design, valve train design, etc. which will improve performance and/or reliability.

1986 The BF short blocks (3 1/8" bore) were discontinued from production and replaced with (3 1/4" bore) B43, P216 short blocks. Note: See Service Parts Bulletin Number 33 for complete details.

1987 Short block designs for the B, N, T and P224 engines were updated and consolidated. Standardized short block assemblies include the following features:

- Oil filter machining
- Premium Performer valve train (including stem seals) and piston rings
- No gearcase cover
- Low speed/high torque camshaft
- Valve covers and breather components
- Premium crankshaft thrust washers
- Six-hole rear face of cylinder block (holes plugged)
- Starter mounting bosses on cylinder barrel
- Short block nameplate
- Short block part number stamped on serial number pad

The features which dictate differences between the various short blocks are:

- Engine displacement (43, 48 or 60 CID)
- Crankshaft configuration (PTO end)
- Special bearing plate configuration

Note: See Service Parts Bulletin Number 48 for complete details.

1989 CCK engine short blocks were updated and consolidated similar to above.

1990 Performer short blocks used to service hydraulic applications with SAE type A and B pump adaptors were changed to the standard bearing plate. HYDRAULIC PUMP ADAPTOR KIT FOR TYPE A OR TYPE B MUST BE ORDERED SEPARATELY. Note: See Service Parts Bulletin Number 67 for complete details.

1991 The P engine short blocks were updated with the improved pistons and piston rings. The 110- prefix of the short block part number will not be stamped on the crankcase. (Example: Only 3824-01 of the part number 110-3824-01 will be stamped on the crankcase).

Appendix C

CROSS REFERENCE FOR SHORT BLOCK P/N AND PARTS MANUAL

The following table relates various short block part numbers for: engines serviced, engine specification letter serviced, cubic inch displacement, Parts Manual number, Fiche number, and note to explain the update.

SHORT BLOCK PART NUMBER	ENGINE SERVICED	ENGINE SPEC LETTER	BLOCK CID	PARTS MANUAL NUMBER	FICHE NUMBER	NOTES
110-3419-XX (Obsolete)	B43 P216	A-B	43	965-0263	134	Advanced to 110-3423 to service Spec C engines with top breather
